## STAKEHOLDERS AND PUBLIC PARTICIPANTS

Special credit should go to the highly-engaged community of Livingston for their support and enthusiastic participation throughout this planning process.

The list of residents - both from within the City of Livingston and from broader Park County - local business owners, and visitors, who generously gave of their time and expertise to enrich this planning process are too numerous to list, however, their contributions to this Downtown Master Plan were absolutely invaluable.

# SPECIAL THANKS

## PROJECT FUNDING

This project would not have been possible without the generous financial contributions from a pair of key community partners - the Livingston Urban Renewal Agency (URA), and the Montana Department of Commerce's Montana Main Street (MMS) Program.

The URA generously contributed funding to this Downtown Master Plan to specifically supplement the Housing and Parking Study components of the effort.

The MMS Program provided a grant to the City of Livingston to supplement the funding of the overall planning process. The program provides support to rural communities across the state to strengthen and preserve historic downtowns, such as Livingston. The MMS Program works closely with local partners to identify and plan for the community's greatest development needs and provides seed money to help implement high-impact projects, reinforcing the fundamentals of the Main Street America Program - **Economic Vitality, Design, Promotion, and Organization.**

- Visioning & Public Engagement
- Vision Themes

## MASTER PLAN INTENT & ORGANIZATION

The first official Downtown Master Plan for the City of Livingston, this plan will be used to prioritize and allocate resources for future public improvements and investments in Downtown Livingston.

Historically, Livingston served as the railway gateway to Yellowstone National Park, America's First National Park, and therefore it has had an iconic and vibrant downtown environment for over a century. With the departure of passenger rail in the late 1970's, the Downtown lost one of its primary drivers of visitation and tourism. Remarkably, unlike many other small railroad towns, Livingston's Downtown has retained much of its historic character, charm, culture, and vitality through that transition from a true gateway community, to one that benefits from its adjacency to a National Park. In addition to its unique National Park proximity, Downtown Livingston also benefits from its direct relationship with beautiful natural environments such as the Yellowstone River and its remarkable river parks - Sacajawea & Miles Park - and the Paradise Valley. Beyond its rich history, Livingston sets itself apart as a hub for outdoor activities, the arts, and active recreation.

Given the richness that already exists in Downtown Livingston, the intent of this Master Plan process was largely focused on leveraging and supplementing successful efforts already underway in the Downtown - aimed at ensuring a continually vibrant and more resilient future for the Downtown - as opposed to attempting to wholly reinvent an atrophying downtown environment, which is the case with many Downtown Master Plan efforts. Therefore, this Plan is organized to reflect the vision of an engaged (and understandably proud) community in its first chapter; to provide a framework for guiding efforts toward realizing that vision for the Downtown in its second chapter; and to articulate specific steps and projects to work toward implementing the Plan in its final chapter.

# PLAN BACKGROUND

## ESTABLISHING THE SCOPE

### Study Area Boundary

With direction from the 2021 Growth Policy, the study area for the Downtown Master Plan was determined to strategically align with the boundary of the Urban Renewal District. The study area encompasses the Urban Renewal District and the CBD Zone District, ~2.5 blocks of which are not currently within the Urban Renewal Boundary (see Study Area map on the following page). This strategic alignment was done to capitalize on the Urban Renewal Agency's ability to leverage Tax Increment Financing (TIF) dollars to reinvest in this area, as the community implements the Downtown Master Plan. In this way, investments in the Downtown can benefit from this additional funding stream, and the return on those investments can be reinvested into other improvements in the area.

This area within the City is also the beneficiary of active entities that can serve as critical champions and partners in the implementation of this Plan's recommendations, including the Chamber of Commerce, the Business Improvement District (BID), and the Livingston Downtown Building Owner's and Business Association (LDBOBA).

Past studies in this area, including, but

not limited to, previous streetscape improvement plans and explorations, as well as the 2022 Trails and Active Transportation Plan, have served as important inputs into the development of this Plan's final recommendations.

### Leveraging the Downtown's Character, the Historic Railroad, Sacajawea & Miles Park, and the Yellowstone River

The Downtown Historic District, recognized by the National Register of Historic Places, is an iconic and defining part of Downtown Livingston. Just a few blocks from the Livingston Depot Center, which was the former passenger rail station, and the predominantly commercial core, is a pair of the region's most distinguished parks - Sacajawea & Miles Park - along with direct access to the Yellowstone River. While each of these unique amenities exists in close proximity to each other, and is unquestionably an advantage for Downtown Livingston, an important part of the scope of this Plan was to encourage linking those assets together with greater intentionality.

The rail side of the Livingston Depot Center

## 2021 GROWTH POLICY DIRECTION

In June of 2021, the City of Livingston adopted its Growth Policy, and this Plan represents a step toward implementation of that policy direction.

Specifically, Objective 6.1.5 in the Growth Policy is to "Plan for and attract new investment into the downtown district to support local businesses." Strategy 6.1.5.3, nested under that Objective, provided direction to, "Explore creating a downtown master plan focused on the Urban Renewal District," and the scope of this effort was further shaped by Strategies 6.1.5.1, 6.1.5.2, and 6.1.5.4, which spoke to developing effective wayfinding; developing a parking strategy, while considering the removal of parking space minimums in the downtown; and exploring mechanisms to strengthen and enhance the URA's effectiveness to encourage redevelopment.

# PLAN BACKGROUND

## STUDY AREA DEMOGRAPHICS

Before commencing the planning process, a high-level analysis of Study Area Demographics was performed, and it identified the following:

1,362 residents in Study Area  
15% of citywide population

776 households in Study Area  
18% of citywide households

Further reflecting on the household and resident demographic data shown above, and compared to statistics for the City overall, Study Area residents were also found to have:

- A **higher median age** (48.3 years)
- A **lower median household income** (\$44,892)
- A **smaller average household size** (1.7 persons)

Additionally, the Study area has shown the following growth since 2010:

- 285 residents
- 126 households

## ECONOMIC / BUSINESS CONDITIONS

In terms of the number of businesses and jobs in the Study Area, the following was identified:

333 businesses in Study Area  
53% of citywide businesses

2,175 jobs in Study Area  
50% of citywide jobs

Studying the types of businesses and industries that comprise those statistics, the findings reflected the following:

### Most prevalent Business Types in the Study Area -

- Retail Trade (55)
- Professional Services (32)
- Accommodation / Food Service (25)
- Health Care (25)

### Largest Industries by Employment -

- Public Administration (505)
- Retail Trade (352)
- Education (352)
- Accommodation / Food Service (157)
- Finance / Insurance (144)

The Study Area is comprised of a robust mix of uses, including hospitality, residential, and commercial.

# PLAN BACKGROUND

## PEER COMMUNITY COMPARISON

Identifying and studying communities with a similar composition of households and jobs inside their Downtowns can provide a shortlist of applicable communities to look to for inspiration and insight into how they may have wrestled with, and addressed, challenges comparable to those in the City of Livingston. Because the Study Area for this Master Plan spans roughly a half-mile radius from the center of the commercial core, potential Peer Communities that were explored also were assessed within that half-mile radius from their commercial cores.

Based upon this research, Downtown Livingston has a comparable number of Households within a half-mile radius of its commercial core as several of the other communities identified, however, in terms of jobs within that same half-mile radius, Downtown Livingston has a significantly lower number than nearly all of the same communities.

## VISITATION TRENDS

Following the COVID-19 pandemic, National Parks have seen a notable uptick in seasonal visitation. For communities such as Livingston, this represents an opportunity to capitalize on that visitation to infuse additional tourism-driven revenue into the downtown.

Yellowstone National Park visitors, in particular, represent the following:

- An estimated 3,645,000 annual visitors to the area;
- 39% of whom spend the night in the Yellowstone area; with
- An average of 5.8 nights spent for overnight visitors.

In a corresponding trend, Lodging Tax collected in the Livingston Convention and Visitor's Bureau Area rose from an average of \$267,761 from 2015-2020 (topping out at \$297,629 in 2017) to \$519,818 in 2021 and \$500,610 in 2022. This significant increase only further reinforces that there is currently tremendous momentum and visitation interest in Downtown Livingston, and the opportunity for local economic growth is ripe.

# PLAN BACKGROUND

A Housing Study, completed as a part of this Downtown Master Plan process (See Appendix), took a detailed look at the Economic & Demographic profile of the Downtown Area, and compared that to Real Estate Market conditions over the last ~10+ years. The study confirmed community feedback received throughout the process related to the need for attainable housing in the Downtown, identifying the following existing gaps in Housing, along with a projection of the corresponding future demand.

## HOUSING NEEDS AND DEMAND

The population and housing stock in Livingston has been growing at a steady rate for the past 10-15 years. However, the cost and composition of the housing stock in Livingston has started to shift. The City attracted a greater share of new for-sale housing in the past decade, as for-rental housing has not kept pace and the number of rental units in the Downtown has even declined since 2010. Housing prices have also been increasing in the City, especially in the past 5 to 7 years. The median list price in the City has grown to \$637,500 and the average list price is over \$1 million. The median home price is now out of reach for residents earning 150% or less of the AMI (\$133,800 annually for a family of 4), which is 60% of owner-occupied households.

This growth in for-sale housing has occurred despite the employment growth in the City and Park County having been predominately in industries that pay average to below average wages. Since 2018, 80% of job growth in Park County has been in industries that equate to households earning less than 120% of AMI (\$90,000 to \$120,000 household income per year depending on households' size). During the past decade, the small inventory of traditional apartments in the City has grown only slightly. Housing availability and affordability have become more pressing issues, especially for renters.

### Cost Burdened Households

Nearly half of renter households (49.5%) in Livingston are cost burdened, meaning they spend more than 30% of their income on rent, or severely cost burdened, meaning they spend more than 50% of their income on rent.

The median rental rate in the City has increased to \$1,900 per month. This rental rate is not affordable for households earning less than 100% of AMI, which is about 2/3rds of rental households in the City. In comparison, approximately 28.8 percent of households who own their homes are cost burdened. Because

homeowners typically have more stable housing and housing costs, a higher share of renter households are often more likely to be cost burdened.

Source: U.S. Census ACS 5-Year Estimates, Economic & Planning Systems

- Not Burdened
- Cost Burdened (30-49%)
- Severely Cost Burdened (>50%)

# PLAN BACKGROUND

The City has also experienced growth in the number of seasonal residents and households. The housing vacancy rate for the City is 16 percent. Over half of these vacant homes are used as seasonal homes or rentals. The City has attracted recent housing development in multifamily housing with new for-rent and for-sale housing projects occurring in the City (but outside of the Downtown Study Area). Rental rates for the new units have ranged from \$1,700 to \$2,000 per month, with some units above \$2,000 per month. The new multifamily condos built in the City have sold for under \$400,000, which has added more attainable for-sale housing for residents and workers.

Opportunities to add “gentle density” at the rear of a lot, while adaptively reusing an existing structure, is a method of subtly adding a diversity of units in a manner compatible with the existing block structure and development patterns in the Downtown.

## Employment Driven Demand

The City of Livingston overall needs to continue to attract a diversity of housing product to the City to keep pace with employment driven demand. It is projected that Park County needs roughly 130 housing units annually to keep up with job growth at 2.0 percent per year. For reference, the average annual rate of growth since 2010 has been 0.9 percent in the City of Livingston. More attached and multifamily housing can help provide a greater diversity of options that are often more affordable than detached single family homes. The demand for more rental options affordable to the City’s workforce is the most pressing need for the community.

Downtown can help play an important role in supporting housing diversity as it is the place that is best suited for more dense housing product. Based on these county housing demand projections, Livingston can support approximately 85 new housing units per year over the next 10 years to keep pace with workforce demands. Using past construction trends and that employment growth expectation, the following is an estimated unit mix reflecting that projected housing demand - showing a mix of Single Family, Missing Middle (Townhome/Triplex/Duplex), and Multifamily housing need, with a greater share demand for attached and multifamily housing.

| Description                        | Factors       | 2022-2026  | 2027-2032  | Total      | Annual    |
|------------------------------------|---------------|------------|------------|------------|-----------|
| New Unit Demand in Livingston      | 85/yr.        | 425        | 425        | 850        | 85        |
| Livingston Construction Projection |               |            |            |            |           |
| Single-Family (Detached)           | 40.0%         | 170        | 170        | 340        | 34        |

# PLANNING PROCESS

## A COMMUNITY-LED VISION

The roughly year-long planning process was “soft launched” in July 2023 - with the debut of a webpage hosted on the Livingston Business Improvement District’s (LBID) website ([www.downtownlivingston.org](http://www.downtownlivingston.org)), and a Preliminary Visioning Survey.

An emphasis of the process was to ensure that the vision, and the resulting Plan, were truly reflective of the Livingston community. In order to meet this charge, efforts were made to reach a diverse set of stakeholders, including both the local community, as well as Park County residents and visitors to the Downtown. Targeted demographics included local business and property owners, developments, members of local non-profit organizations, youth and seniors in the community. To solicit input from those stakeholders, and incorporate their feedback into the overall community-led vision, a variety of touch points were employed, including:

- “Intercepts” at community events
- Stakeholder Interview phone calls & Zoom meetings
- Email correspondence
- Surveys - online and hard-copy
- Study Area Walking Tours
- A Community Workshop/Charrette

- A Business Owner Breakfast
- A Public Open House
- Focus Group Meetings
- Presentations at Public Meetings - City Commission & URA Board
- A 24/7 “Share Your Ideas” Online Interface

Those various engagement methods were employed throughout the process, but there were three “Key Outreach Windows” (see Project Timeline graphic below) in which a number of touch points were scheduled over consecutive days, in order to generate additional interest and momentum, and to consolidate the ask of more robust and active public participation.

## PRELIMINARY VISIONING

A Preliminary Visioning Survey was launched in July 2023 through promotion at City events coinciding with Independence Day, fliers posted at local businesses, introductory project presentations as public meetings with the URA Board and City Commission, a booth at the mid-August Farmer’s Market, through the project website, the City Manager’s newsletter, and email distribution lists. Applicable to an audience including Livingston residents, Park County residents, and visitors, the survey primarily focused on assessing the frequency of Downtown visits, soliciting reasons for Downtown visits, identifying assets in the Downtown, asking for ways

# VISIONING & PUBLIC ENGAGEMENT

in which the Downtown experience could be improved, and finally, asking Livingston and/or Park County residents to provide their personal vision for Downtown Livingston in one word. The most frequent response to that one-word vision - “Community” - echoed similar sentiments expressed in the citywide Growth Policy effort in 2021, as well as responses to a prompt for a one word “favorite part of Downtown Livingston” (see Word Clouds below).

Locals’ “One-Word Vision” responses [most frequent responses shown in larger, bolder typeface]

Locals’ “One-Word Vision” responses [most frequent responses shown in larger, bolder typeface]

The survey was offered via the website using an online interface, but was also distributed as a hard copy version in key locations (such as the Park County Senior Center) to help reach those that may not have access to, or a level of comfort with, the online interface. Over 390 individual respondents participated across both formats, and a wealth of open-ended inputs were collected, in addition to the specific prompts contained within the survey.

Of those who participated, 77% identified as Livingston residents, 15% identified as a resident of a surrounding community in Park County, and 8% identified as a visitor to the Downtown from outside Park County. About 1/3rd of participants indicated that they live and/or work in the Downtown.

Locals’ reasons for visiting Downtown Livingston

Those who identified as residents of Livingston and/or Park County were asked, “What brings you to Downtown Livingston most often?” Their top 3 responses were “Dining,” “Shopping,” and “Events,” with “Socializing with my community” in a close 4th. This greatly reinforced a sentiment of the Downtown’s role as primarily an entertainment hub for the community. Visitor respondents also indicated that “Events” were a strong draw for coming to Downtown Livingston.

In terms of frequency of visitation, approximately 92% of those same respondents said they spend time in Downtown Livingston at least weekly, showing a consistent visitation from locals. (See charts below.) Conversely, over half of visitor respondents said they only visit a few times per year.

Locals’ frequency of visits to Downtown Livingston

# VISIONING & PUBLIC ENGAGEMENT

## PRELIMINARY VISIONING - KEY TAKEAWAYS

Based upon all of the inputs from the Preliminary Visioning Survey, as well as all aggregated and summarized inputs from all of the other outreach conducted, a Results Summary was produced, which articulated the following Key Takeaways:

- A strong emphasis on the community, as well as an appreciation of the history/historic architecture/main street character & charm in the Downtown
- Reinforcing the favorite part of Downtown, a desire to maintain and preserve the community and character, while making it more vibrant and accessible (including from a parking standpoint)
- Sampling of Consistent Themes of “One Thing to Improve” shown at right

## WELCOME VISITORS; PLAN FOR LOCAL NEEDS

One nuanced sentiment that was consistently expressed throughout the entirety of the Preliminary Visioning phase was a desire to prioritize local needs first, while still welcoming visitors. The thinking was that if Downtown can thrive as a place that locals will dependably visit and patronize, then tourist patrons will only further contribute to, and enhance, the Downtown's vitality and resilience.

# VISIONING & PUBLIC ENGAGEMENT

Community Workshop / Charrette Presentation

Community Workshop / Charrette Small Group Participants

Community Workshop / Charrette Presentation

## COMMUNITY WORKSHOP / CHARRETTE

On Tuesday, November 14, 2023, from 5:00 - 7:00 pm, the City of Livingston hosted a public Community Workshop / Charrette at the Livingston Depot Center - the 1902 Northern Pacific railway station, located right in the heart of Downtown Livingston. Over 55 community members were in attendance, in addition to City Staff and consultant team members.

The workshop began with a Map Gallery / Open House session, where participants were encouraged to mingle with fellow community members, viewing maps and boards of Existing Conditions analysis, Early Takeaways, and Emerging Ideas, providing some initial feedback and asking questions of the City Staff and consultant team. Next, members of the consultant team delivered a presentation, highlighting the vision of the community during the Growth Policy process; the study area, scope and preliminary timeline for the Downtown Master Plan effort; demographic and economic conditions in the Downtown, and a selection of peer communities; and emerging Vision Themes based on the community input received to date. Following the presentation, participants were asked to work collaboratively in small groups to complete four map-based Charrette

exercises. Each group was asked to use sticker dots, post-it notes, markers and pens to mark up the maps with their collective input. The first exercise focused on Land Use & Activation; the second focused on Key Connections; the third focused on Parking Management; and the fourth focused on Art, Amenities & Events.

Following the completion of the exercises, the consultant team discussed next steps for the project, and then participants were encouraged to walk around and view other small groups' exercise results.

Preliminary results from the Community Workshop / Charrette were then presented on Wednesday, November 15th, at a public joint session of the then, Planning Board & Zoning Commission (now reestablished as the as the Consolidated Land Use Board).

Compilation of Land Use Exercise Results from Community Workshop / Charrette

# VISIONING & PUBLIC ENGAGEMENT

## BUSINESS OWNER BREAKFAST

The morning of Wednesday, November 15, 2023, from 7:00 - 8:30 am, the City of Livingston hosted a Business Owner Breakfast, at the Northern Pacific Beanery. The intent for this early morning engagement session was to provide an opportunity for local Business Owners to participate in the Downtown Master Plan process, outside of their normal operating hours, so they would not have to compromise their operations. Over 35 Business Owners attended the breakfast working session, where the consultant team presented much of the information from the previous night's Community Workshop / Charrette, with a greater focus on economic and business conditions in the Downtown. Following the presentation, the consultant team facilitated a discussion with all in attendance to identify - from a business owner perspective - the strengths, weaknesses, opportunities and threats to the Downtown. Finally, business owners were asked to identify the one change / improvement they would most like to see in the Downtown, with consistent themes revolving around:

- Greater collaboration and cross-promotion among businesses
- Infill & 2nd-story (specifically, housing) development
- A cleaner, more vibrant environment

## URA STRATEGY WORKSHOP

In addition to engaging the broader community in mid-November 2023, the consultant team also conducted an initial Strategy Workshop with the Urban Renewal Agency (URA) Board on Tuesday, November 14, 2023. Given the strategic alignment of the Downtown Master Plan study area with the Urban Renewal District boundary, the URA is poised to be a critical implementation partner for recommendations coming out of this Downtown Master Plan effort.

The Strategy Workshop, therefore, focused on the role of the URA in the Downtown, how URAs in the state of Montana have a wide range of potential actions that can make use of Tax Increment Financing (TIF) funds, and what programs URAs in other Montana communities have decided to invest in. URA Board Members then discussed their individual visions for the Downtown and for the URA's role in support of that vision. From a vision standpoint, key themes from the URA Board were:

- Supporting local business & ownership
- Activating downtown (living, working, visiting)
- Better connecting downtown's assets
- Ensuring the downtown is an inviting place to be

Business Owner Breakfast Attendees at the Beanery

Sampling of Business Owner Breakfast feedback

Business Owner Breakfast Discussion

# VISIONING & PUBLIC ENGAGEMENT

## PUBLIC OPEN HOUSE

To further diversify the engagement opportunities presented during the visioning stage of the process, the City of Livingston also hosted a Public Open House on Thursday, November 16, 2023 from 5:00 - 7:00 pm at the Shane Lalani Center for the Arts.

The Open House was designed as a drop-in, gallery-style event, consisting of a series of interactive stations that attendees could engage with at their leisure, and as their availability allowed. The first station in the Open House gallery included an overall introduction to the project - including discussion of the project scope and study area boundary, timeline, opportunities to get (and stay) involved through the website and email distribution lists, and advertisement of the “Share Your Ideas” interface (explained in greater length on p. 17). This station also identified the specific direction from the Growth Policy that recommended the creation of the Downtown Master Plan effort, and shared a sampling of the preliminary visioning feedback that had been received from the community. The next station presented a set of 8 Emerging Ideas - gleaned from initial community feedback - for each of 4 categories (Land Use & Activation Improvements; Arts, Culture & Amenities Improvements;

Streetscape & Mobility Improvements; and Parks & Open Space Improvements). Participants were asked which of these ideas should be prioritized or further explored, and opportunities were available to add new ideas to that list. The third station presented some Early Takeaways from analysis performed by the consultant team looking at Underutilized Parcels & Opportunity Sites in the Study Area, as well as a map showing Parking Utilization, based on parking counts performed in the month of August. The final station presented a summary of feedback received at the Community Workshop / Charrette two nights prior, and welcomed input from Open House attendees on the same set of exercises.

City Staff and consultant team members were available at each of the stations to help participants navigate the exercises and answer questions about the content at each station, or about the project in general. Attendees also had the opportunity to provide open-ended feedback via a comment form, and via a short survey on their mobile devices through Mentimeter.

Public Open House Attendees

Public Open House Attendees

Opportunity Sites Analysis from Public Open House

# VISIONING & PUBLIC ENGAGEMENT

## EMERGING IDEAS SURVEY

Acknowledging that not all community members have the interest or availability to participate in the variety of in-person engagement events that were offered, the project team felt it was important to offer additional opportunities for community members to provide feedback on the same materials in other venues/methods.

One such additional opportunity was the creation of an Emerging Ideas survey to replicate the feedback that was solicited at the Community Workshop / Charrette and the Public Open House. The survey was offered in an online format, which was shared with the project's email distribution list and posted on the website, as well as a hard copy format, which was specifically deployed at the Park County Senior Center, as well as a community bike event in the Downtown.

Feedback collected from the Emerging Ideas survey was then aggregated with the feedback collected on those same inputs from the in-person events.

Emerging Ideas Survey Results

Emerging Ideas Survey Results

# VISIONING & PUBLIC ENGAGEMENT

## “SHARE YOUR IDEAS” INTERFACE

Screenshot of “Share Your Ideas” Interface widget

One community-driven engagement method that provided great insight throughout the process was an online “Share Your Ideas” interface, where community members could contribute their ideas for the Downtown 24 hours per day, and 7 days per week. The desire for an “all hours” engagement interface was an idea that was mentioned at a number of the in-person engagement events, including the Farmers Market, the Community Workshop / Charrette, and the Public Open House. Multiple community members mentioned that a great idea often comes to them at times outside of scheduled engagement events, and having to send an email to City Staff and/or the consultant team can be an intimidating barrier to contributing that idea.

A simple form was added to the project webpage that prompted the user to choose a category for the type of improvement they would like to share ideas about, in one of the following categories:

- Streetscape & Mobility Improvements;
- Arts, Culture & Amenities Improvements;
- Parks & Open Space Improvements;
- Land Use & Activation Improvements;
- Community Assets; and
- Other

After selecting a category, participants were free to share open-ended input and ideas. Over 200 ideas were submitted through this interface by 140 participants.

Map Exercises at the City’s Farmers Market Booth

Distribution of Responses by Category

# VISIONING & PUBLIC ENGAGEMENT

## FOCUS GROUPS

As all of the community input from the visioning stages of the process was translated into a preliminary draft of a Master Plan Framework, a series of topic-based Focus Groups were convened to solicit input on those “big ideas.” These topic-based Focus Groups, hosted in-person in the Green Door Gallery space at Wheatgrass Books on February 27, 2024, were organized into the following categories, in an effort to solicit input from a broad variety of perspectives:

- Environment & Active Transportation
- Housing & Development
- Business Owners
- Arts, Culture & History
- Economic Development & Tourism

The Focus Groups were comprised of dozens of community members who are advocates and subject matter experts in each of the topics, and generously gave their time and expertise to better inform plan recommendations.

Focus Group participants were presented with a preliminary draft of the Master Plan Framework diagram, while the consultant team explained the physical locations and scope of each of the recommendations illustrated on the diagram. A discussion on how to better align the framework with the community’s Vision Themes followed,

and participants were welcomed to mark up the diagrams with their feedback.

Another forum that functioned as a Focus Group meeting was a follow-up session on February 27, 2024 with the URA Board. During that public meeting, the consultant team presented a draft Strategy Framework to the URA Board that aligned with the preliminary draft of the Master Plan Framework, and solicited feedback and refinement from the Board to coincide with adoption of the Downtown Master Plan - better setting the URA up to be an impactful Plan implementor.

In addition to the more topic-based Focus Groups and the URA Board, an effort was made to specifically engage a set of youth voices in the community - an often underrepresented perspective in the more technical aspects of plan recommendations - during this stage of the process. With a Downtown Master Plan envisioning next 15-20 years, youth in the community will be some of the greatest beneficiaries of Downtown improvements. On February 28, 2024, a group of Park High School students generously spent some of their afternoon participating in a Focus Group conversation over Zoom, providing invaluable feedback on the preliminary draft of the Master Plan Framework.

# VISION THEMES

## ESTABLISHING THE CHARGE

Through the wealth of ideas and input gleaned from the various forms of community engagement, a set of common Vision Themes emerged. These Vision Themes, though a higher-level set of ideas, can be thought of as the “charge” that the community has stated for what it would like to achieve for the future of its downtown.

The following five Vision Themes were consistently expressed desires throughout the process regarding the future of Downtown Livingston:

A mix of uses in the Downtown core helps to keep the public realm vibrant.

The Yellowstone River, Sacajawea Park & Miles Park are spectacular amenities in the Downtown area.

The Downtown has an already robust emphasis on the arts.

### Diversify the Mix of Uses in the Downtown

- Serve the daily needs of locals with a variety of uses in the Downtown, while supplementing those uses with authentic interests for visitors.

### Strengthen Connections to the Wealth of Assets

- Engage the rail history, the Yellowstone River & strengthen the gateway relationship to the National Park, with an emphasis on Heritage Tourism.

### Right-Size Parking for Economic Vitality

- Ensure parking supply supports local business needs along with any future redevelopment.

### Find Opportunities to bring the Parks into Downtown and provide better access from Downtown to the Parks

- Leverage the Downtown's proximity to National Register of Historic Places amenities Sacajawea and Miles Park, and find ways to extend the beauty of the parks into the Downtown and while providing more comfortable access from Downtown into the parks.

### Build Upon Arts/Culture/ Programming to continue to activate the Downtown as a critical “Third Place” for the community

- Celebrate Livingston's unique history, character & local culture by making the Downtown the community's gathering place, and the place visited most by community members after their home (“first place”) and work (“second place”).

### TOPICS IN THIS CHAPTER:

- Master Plan Framework Recommendations
- Land Use, Building Form & Activation
- Streetscapes & Mobility
- Parks & Open Space
- Arts & Culture
- Economic Development & Housing

### MOVING FROM VISION TO ACTION

Building upon the Vision Themes articulated by the community throughout the engagement process (and outlined in the previous chapter), the Master Plan framework diagram, and accompanying Master Plan Framework recommendations in this chapter, provide physical planning guidance on how to begin to move that vision toward action. This guidance is organized by five primary categories, the first four of which align with the categories for which the community provided input throughout the process - Land Use, Building Form & Activation; Streetscapes & Mobility; Parks & Open Space; and Arts & Culture. The fifth category, Economic Development & Housing, provides guidance on maintaining and growing the economic vitality of the downtown.

For each of the five categories, flexible guidance is provided on how to move forward to implement the vision - in some cases, through incremental steps and/or “quick wins,” and in other cases, through longer-term, strategic policies, initiatives, and investments.

More detailed, implementation-oriented projects and strategies to advance the Master Plan Framework are found in the next chapter’s Implementation Action Plan.

NOTE: For each of the recommendations that follow, the City will need to coordinate and adhere with state and federal standards for on-system routes - a category of roads that are updated annually by the Montana Department of Transportation (MDT).

# MASTER PLAN FRAMEWORK RECOMMENDATIONS

Although the Master Plan Framework Recommendations are organized into five primary categories, the recommendations tend to be inextricably linked to recommendations in other categories. In this way, progressing a specific recommendation into implementation can represent progress for the City of Livingston across each of the four categories, and ultimately is a step toward realizing the Downtown Master Plan's Vision Themes to: **Diversify the Mix of Uses in the Downtown; Strengthen Connections to the Wealth of Assets; Right-Size Parking for Economic Vitality; Find Opportunities to bring the Parks into Downtown and provide better access from Downtown to the Parks; Build Upon Arts/Culture/Programming to Continue to Activate Downtown.**

The five categories in which the recommendations are organized are: Land Use, Building Form & Activation; Streetscapes & Mobility; Parks & Open Space; Arts & Culture; and Economic Development & Housing. The following are the areas of emphasis for each of these categories - included in recommendations pages that follow in this chapter:

## LAND USE, BUILDING FORM & ACTIVATION

- Building Height & Massing
- Building Form
- Use-Based Activation
- Spatial Activation

## STREETSCAPE & MOBILITY

- Streetscape Improvements
- Enhanced Connectivity & Mobility Options
- Parking

## PARKS & OPEN SPACE

- Existing Parks
- Pocket Parks & Programmable Open Spaces
- Street Trees/Landscaping/Shade Opportunities
- Natural Environments

## ARTS & CULTURE

- Public Art & Storytelling
- Events & Amenities

## ECONOMIC DEVELOPMENT & HOUSING

- Economic Development
- Housing

## MASTER PLAN FRAMEWORK DIAGRAM

The Master Plan Framework Diagram on the following page is a graphic representation of the physical location of many of the Master Plan Framework recommendations. It is intended to illustrate how the recommendations, across each of the first four categories (Land Use, Built Form & Activation; Streetscapes & Mobility; Parks & Open Space; and Arts & Culture) are spatially interconnected and can work in concert to advance the realization of the community's Vision Themes.

Economic Development guidance, and some of the more policy-oriented recommendations may not be represented on the diagram, as their spatial distribution may either be yet to be determined, or may impact the Downtown Study Area more holistically.

Similarly, some of the more geographically defined, project-based elements illustrated on the diagram may be mentioned at a high-level in this chapter, but then are explained and illustrated in greater detail in the Implementation Action Plan chapter that follows. Such projects are noted on the diagram and in this chapter.

Master Plan Framework Diagram [Study Area Boundary = ————]

# LAND USE, BUILDING FORM & ACTIVATION

## BUILDING HEIGHT & MASSING

### LU-1. Prioritize compatibility with the historic building fabric in the Central Business District, by introducing a height limit to the CBD Zone District in the upcoming Zoning Code Update.

(SEE MASTER PLAN FRAMEWORK DIAGRAM FOR RECOMMENDED LOCATIONS)

- Current “Maximum Height for all Buildings” in the CBD Zone District is “n/a.” Although unlikely that market conditions would support excessive height, clear communication with respect to community priorities should be contained in the Zoning Code. Therefore:
  - \* Consider a 3-4 story height limit within existing Historic District boundary.
  - \* Consider a 5-6 story height limit in the southern portion of Downtown around Main Street; natural topography sloping toward the river will help to minimize visual impacts to views from the north portion of Downtown (SEE MASSING SIMULATIONS AT RIGHT).
  - \* Sensitive height and massing transitions should be prioritized along Clark Street, adjacent to existing single-family residential structures.
- For clarity, consider creating two CBD Zone Districts to clearly map the areas with different maximum height allowance, and to allow for additional massing requirements.

### LU-2. Encourage building massing that engages the street to enhance the pedestrian experience, only setting back at the ground floor when providing an amenity such as patio seating, public art, or retail display space.

### LU-3. Encourage building massing with the CBD Zone District that sets back at upper stories, to respect adjacent structures and maintain view corridors, especially along Main Street.

## BUILDING FORM

### LU-4. Prioritize uses with pedestrian-oriented forms by eliminating Highway Commercial zoning within the Downtown Master Plan Study Area, in favor of CBD or R-II zone districts.

(SEE MASTER PLAN FRAMEWORK DIAGRAM)

### LU-5. Support compatible infill development on sites identified as priorities by the community, encouraging alignment with stated desired uses. (SEE MASTER PLAN FRAMEWORK DIAGRAM AND CH. 3 - PRIORITY INFILL/REDEVELOPMENT SITES)

Current Zoning Map to show Highway Commercial Parcels (in Blue) along key Park Street gateway experience

Massing simulation of 5-story volumes (red, in background) in southern portion of Downtown

Massing simulation of 6-story volumes (blue, in background) in southern portion of Downtown

## LAND USE, BUILDING FORM & ACTIVATION

Cafe Seating / Outdoor Dining

Active Ground Floor Uses

Transparent & active ground floor frontages

**LU-6. Promote Adaptive Reuse of existing structures to preserve the character of the Downtown environment, while allowing for a diversity of uses.**

**LU-7. Provide more specific design guidance in the upcoming Zone Code Update for Main Street within the Historic District.**

- Introduce tools and improved processes to enable more thoughtful review of development proposals from the Historical Preservation Commission

**LU-8. Encourage building forms in the Downtown with transparent ground floor frontages, allowing active uses inside to visually enliven the streetscape.**

### USE-BASED ACTIVATION

**LU-9. Continue to support mixed-use development in the Downtown environment, with an emphasis on expanding housing availability.**

- More consistent activity and residency within the Downtown is a benefit to all Downtown businesses.
- Recently annexed (and zoned Mixed-Use) View Vista Village should be prioritized as a location for continued residential uses.

**LU-10. Encourage active ground floor uses that contribute to a vibrant Downtown environment throughout the day, and align such uses with any updates to the Zoning Code in the Downtown Study Area. (SEE**

MASTER PLAN FRAMEWORK DIAGRAM)

- Incentivize active ground floor uses particularly along the southern portions of Main Street and along Geyser Street, to extend the activity of Downtown toward the Yellowstone River, Sacajawea Park & Miles Park
- Applicable active uses should include:
  - \* Ground floor retail;
  - \* Dining establishments, such as restaurants, bars, and coffee shops;
  - \* Commercial services for residents, such as yoga studios, barber shops, and child care;
  - \* Makers spaces, art studios, breweries and distilleries; and
  - \* Hotels and other hospitality uses.

**LU-11. Accommodate cafe seating and outdoor dining in the public realm, when possible - maintaining a minimum 6' clear sidewalk space. (SEE ALSO LU-21, UNDER SPATIAL ACTIVATION, AND CH. 3 - REGULATORY TOOLS)**

# LAND USE, BUILDING FORM & ACTIVATION

**LU-12. Work with tenants, landlords, and property owners to encourage Seasonal Use Agreements for retail spaces to maximize ground floor active uses and cultivate the desired mix of uses.**

**LU-13. Continue to pursue & incentivize upper story Adaptive Reuse.**

- Upper story residential uses are desirable, given the need for housing in the Downtown, yet are costly, given the extent of plumbing, HVAC, and access renovations that may be required.
- When upper story residential uses are not feasible, office uses, makers spaces, and hospitality uses should be pursued, as additional activity is a benefit to the Downtown.

**LU-14. Increase housing choice and diversity in Downtown with strategic Infill Development opportunities.** (SEE CH.3 - HOUSING DEVELOPMENT)

- Explore forms of housing such as Live-Work units to serve a local trades workforce.

**LU-15. Increase office space opportunities to meet the demand and help to activate the Downtown during the day.**

**LU-16. Provide public restrooms in the Downtown to enhance the resident and visitor experience.**

- Particularly during high visitation, local businesses are strained to make their restroom facilities available to non-patrons.
- Consider piloting a temporary/mobile public restroom facility to identify an optimal location.
  - \* Initial locations to consider would be the Depot Center linear park to accommodate visitors in particular, a location on Main Street, and in the publicly-owned parking lot adjacent to the Lincoln School (who has also expressed a willingness to make their restrooms available during temporary events).

**LU-17. Identify and support a location for a “daily needs” use - drugstore, general store, local convenience store, etc. - on the south end of the Downtown.**

**LU-18. If a new Wellness Center provides new pool facilities, be intentional about activating the site of the existing pool with a community-oriented use.**

- The location is a natural convergence point of some of the physical recommendations of this Plan - the 2nd Street Promenade, the Festival/Greenway Street, and a natural gateway to the river parks.
- A business incubator space, inclusive of a commercial kitchen, could activate the space and have ties to the Civic Center and Farmers Market events.

Public Restroom example in Steamboat Springs, CO.

The closure of Gray's General Store has amplified the need for that type of business use in the Downtown.

Alley Activation focused on surface treatments, pedestrian lighting and subtle landscape elements.

# LAND USE, BUILDING FORM & ACTIVATION

## SPATIAL ACTIVATION

**LU-19. Encourage Alley Activation in the Downtown Study Area to enhance the attractiveness of the Downtown and provide other safe paths of pedestrian travel.** (SEE MASTER PLAN FRAMEWORK DIAGRAM)

- Active alleys can include:
  - \* Enhanced paving, landscaping, inclusion of public art, etc.
  - \* Small-scale uses that open to the alley, as they would to the street;
  - \* Delineated areas for passive pedestrian and bicycle movement.
- Thoughtfully accommodate trucks, deliveries, trash collection, and other business access needs.
  - \* Coordinate such activities to try to consolidate access needs at a predictable, consistent time each day.

**LU-20. Activate and amenitize areas along Front Street and Park Street, adjacent to the rail lines.**

- Expand the programming of the space with Food Trucks, and temporary events for visitors and locals.
- Explore adding EV charging infrastructure at these highly visible visitor entry points.
- If passenger rail returns to Livingston, explore expanded parking along Front Street, with

ticketing kiosks and a potential pedestrian bridge to directly connect riders to and from Park Street.

**LU-21. Explore the use of Parklets as a way to activate underutilized parking areas.** (SEE REGULATORY TOOLS)

- Allow businesses to secure a permit to repurpose parking directly in front of the business for a Parklet.
- Parklets could include cafe seating for businesses, art installations, shaded seating for downtown patrons, etc.
- Parklets should have a consistent material palette, standard dimensions, be ADA accessible, and could be city-owned and leased to businesses.

**LU-22. Establish a small fund dedicated to pilot projects / proof of concepts in the Downtown to foster entrepreneurial activation in the public realm.**

**LU-23. Leverage the already active Business Improvement District (BID) and Chamber of Commerce, and supplement with City resources to support additional programming.**

- Create a coordinated Marketing Plan for the Downtown.

**LU-24. Support Temporary Events as a way to keep the Downtown vibrant year-round.** (SEE OPEN SPACES)

Use of a parklet - designed & fabricated by MODSTREET - to expand outdoor dining potential.

Parklets can be City-owned to ensure design consistency and then leased to local businesses.

Temporary Events such as a Food Truck night can help activate the Downtown environment.

# STREETSCAPES & MOBILITY

## STREETSCAPE IMPROVEMENTS

### SM-1. Implement traffic calming measures within the Downtown to prioritize safety.

- Implement lower cost, temporary measures such as a neighborhood traffic circles during higher traffic and visitation seasons to evaluate the success of the intervention before installing permanent measures.
- Explore adding additional traffic control along highly trafficked corridors through the Downtown Study Area, such as Callender Street, to slow traffic entering the Downtown environment.
- Commit to permanent traffic calming measures in areas adjacent to the community's most vulnerable users, such as near school facilities.
- Explore mid-block crossings in key locations of the Downtown, such as where alleys meet major streets, like the north end of Main Street, and along Callender, Lewis, Clark & Geyser between 2nd Street & Main Street and Main Street & B Street.
- Utilize visual signals such as painted crosswalks, accent paving, etc. to promote a safe and vibrant pedestrian environment.

### SM-2. Work closely with the Montana Department of Transportation (MDT) to prioritize Park Street pedestrian safety improvements

(SEE PARK STREET IMPROVEMENTS).

### SM-3. Prioritize a safe, family-oriented multimodal connection along 2nd Street connecting the Central Business District to the river parks. (SEE 2ND STREET PROMENADE & MASTER PLAN FRAMEWORK DIAGRAM)

### SM-4. Introduce clear gateway elements at key entrances into Downtown to encourage visitation into the Downtown. (SEE WAYFINDING/GATEWAYS & PLAN FRAMEWORK)

### SM-5. Add curb-extensions/bulb-outs in limited high-priority, pedestrian safety-focused locations, and evaluate community response before expanding implementation.

- Curb-extensions at high-traffic locations should be designed with a gentler turning radius to help avoid damage from turning trucks.
- Leverage the City's foresight in strategically locating storm drain inlets (in the recently rebuilt intersections project) so as not to preclude curb-extensions in the future.
- High-priority locations should be along Park Street at Main & 2nd Street; at Main Street and Clark Street to signal the entry of the Festival/Greenway Street (when implemented).

Temporary, neighborhood traffic circle.

## TRAILS & ACTIVE TRANSPORTATION PLAN

In April 2022, the City of Livingston adopted its Trails & Active Transportation Plan as an appendix to

the Livingston Growth Policy. This detailed Plan is applicable to the entire City, but recommendations within the Downtown Master Plan Study Area served as foundational for several of the recommendations in this Plan. When implementing the Downtown Master Plan, the City should cross-reference the Trails & Active Transportation Plan to identify opportunities to broaden mobility by connecting to envisioned multimodal networks outside of the Study Area.

# STREETSCAPES & MOBILITY

Mid-block crossings can help signal a priority of pedestrian safety in the Downtown environment.

Bulbouts with gentler turning radii and roll-up curbs in Downtown Whitefish, MT.

Provide signage to clearly communicate the intent of a higher-ease-of-use facility on roadways identified as Priority Bike Connections.

**SM-6. Add pedestrian-scaled lighting on side streets in the Central Business District, particularly between 2nd Street & B Street along Callender Street, Lewis Street, Clark Street, & Geyser Street, to create a safer nighttime pedestrian environment.**

- Consider pedestrian-scaled lighting along the south portion of Main Street, leading to the river parks. (SEE FESTIVAL/GREENWAY STREET)

**SM-7. Minimize curb-cuts into the pedestrian environment, requiring new developments to take alley access when available.**

## ENHANCED CONNECTIVITY & MOBILITY OPTIONS

**SM-8. Connect with safe and direct pedestrian & bicycle routes to key destinations for local residents.** (SEE MASTER PLAN FRAMEWORK DIAGRAM)

- Enhance key corridors such as 5th Street, Yellowstone Street, 2nd Street, B Street (continuing to N. Main Street), Front Street, Lewis Street, and Geyser Street, which all connect adjacent neighborhoods to the Central Business District, the river parks, and community-serving destinations such as the Depot Center and the Shane Lalani Center for the Arts.

- When implemented, extend connections from the 2nd Street Promenade in the form of a multi-use trail along View Vista Drive, River Drive & the Yellowstone River frontage.

**SM-9. Enhance connectivity to the residential neighborhoods north of Downtown by lessening the rail barrier.**

- Improve the quality of crossings at 5th Street and at the Main to B Street underpass.
- Explore grade-separated crossing potential over the rail.
  - \* Explore the potential of 8th Street, near the Washington School (outside of Study Area), as an opportunity for a longer-term bike/pedestrian crossing on the west side of Downtown.

**SM-10. Create unique streetscape environments to visually signal prioritization of pedestrians and cyclists on key roadways.** (SEE 2ND STREET PROMENADE, PARK STREET IMPROVEMENTS, AND FESTIVAL/GREENWAY STREET)

**SM-11. Explore treatments for higher ease-of-use bicycle facilities (i.e. Bike Boulevards) on roadways that have wider rights-of-way and/or are identified Priority Bike Connections.** (SEE MASTER PLAN FRAMEWORK DIAGRAM)

## STREETSCAPES & MOBILITY

**SM-12.** Provide bike parking at key intersections, adjacent to businesses along bike routes, and where bike routes intersect the Downtown Study Area.

**SM-13.** Provide wayfinding to enhance connectivity, but resist over-populating the streetscape environment.

- Include wayfinding within Sacajawea Park and Miles Park, as well as along the levee trail to better promote the available amenities within the parks.

**SM-14.** Prioritize an improved and separated, non-motorized trail along McGee Drive to enhance connectivity and safety in Sacajawea Park. (SEE MASTER PLAN FRAMEWORK DIAGRAM)

**SM-15.** Complete a Corridor Study on Park Street to inform enhancements to corridor-wide pedestrian connectivity and prioritize a connection across Park Street at 2nd Street.

**SM-16.** Perform a Bicycle and Pedestrian Safety Evaluation every two years for the Downtown Study Area.

- Include a crash data summary and present results to the City Commission to consider recommendations for improvements.

### PARKING

**SM-17.** Optimize available parking within the Downtown Study Area. (SEE PARKING MANAGEMENT)

**SM-18.** Perform a parking assessment every two years to continue to assess the evolving parking needs of the Downtown business and resident communities.

- In addition to a parking demand and utilization analysis, the Parking Study should engage key stakeholders such as the local business community.
- Parking Management strategies used in the previous two years should be evaluated for their impact, and the Parking Study should make recommendations for deploying additional Parking Management strategies, as appropriate.

**SM-19.** Continue enforcement of parking time limits within the Central Business District to promote turnover and increased potential for local business patronage. (SEE PARKING MANAGEMENT)

**SM-20.** Expand EV charging opportunities in areas with high tourist parking in the Downtown.

- Visitors driving electric vehicles are likely to patronize Downtown businesses while awaiting a charge.

Dedicated bike parking, such as a bike corral, can double as a public art opportunity at key locations.

Smaller scale bike & pedestrian wayfinding can effectively direct users, without visual clutter.

Pedestrian connectivity across Park Street - particularly at 2nd Street - is challenging.

# STREETSCAPES & MOBILITY

Consistent directional signage for public parking can promote more efficient parking usage in the Downtown.

Consolidated, signed parking for Downtown employees with permits.

Angled parking in select locations along east-west streets, such as what exists on Clark Street, can help to subtly increase parking capacity in the Downtown.

## SM-21. Consider recalibrating parking requirements by use in the CBD in the upcoming Zoning Code Update. (SEE REGULATORY TOOLS)

- Retain the requirement for commercial enterprises in the Central Business District to meet only 50% of the parking space requirements.
- Revisit apartment unit requirements in the Central Business District (currently at full parking requirement)
  - \* Consider allowing less than the current 1 space per unit, letting the market demand inform design decisions.

## SM-22. Leverage wayfinding signage opportunities to direct Downtown visitors to nearby available parking. (SEE WAYFINDING & GATEWAY TREATMENTS)

- Such signage should communicate distance in blocks or in time it would take to walk, in order to make parking a short distance away seem less daunting.

## SM-23. Work with local businesses to coordinate consolidated areas for employee parking that allow more proximate parking to be utilized by potential patrons.

- Consider City acquisition of a well-located, underutilized private parking lot for such a purpose.

- Consider permit-only parking for employees of the Downtown in select locations.

## SM-24. Explore additional angled parking opportunities, if necessary, along east-west streets in the north portion of the Downtown.

- To subtly increase available parking capacity, some parallel parking could be switched to angled parking in between 2nd Street and B Street, as happens along Clark Street to the south.

## SM-25. Establish a permit program to allow businesses in commercial areas to repurpose parking directly in front of their business for Parklets, if desired. (SEE LU-21 IN SPATIAL ACTIVATION & REGULATORY TOOLS)

- Initial offerings for permits should be located in areas of the Downtown where parking utilization is consistently lower.
- Future Parking Studies should provide guidance on an optimal number of parklets (calibrated by the anticipated loss of parking spaces) and specific blocks within the Downtown where permits will be available.

# PARKS & OPEN SPACE

## EXISTING PARKS

**PS-1.** Future Parks Master Planning efforts should calibrate/right-size park uses & amenities.

**PS-2.** Prioritize connections and access to existing parks.

**PS-3.** Incorporate active nature play elements into existing parks as a means of highlighting the natural environment in Downtown park spaces.

## POCKET PARKS & PROGRAMMABLE OPEN SPACES

**PS-4.** Consider acquisition of underutilized or empty lots for long-term conversion to permanent parks or public spaces, as well as short-term pocket/pop-up parks. (SEE MASTER PLAN FRAMEWORK DIAGRAM)

**PS-5.** Encourage use of underutilized or publicly-owned parking lots for temporary events and activation. (SEE EVENTS & ACTIVITIES)

- Publicly-owned Parking Lot adjacent to the Lincoln School would be a good pilot candidate given the Lincoln School's willingness to make restroom facilities available during events.

**PS-6.** Locate pocket parks adjacent to

local businesses & restaurants, further activating each use.

**PS-7.** Explore Pocket Park and/or Activated Alley conditions in select residential areas, with neighborhood support.

**PS-8.** In the absence of available land, utilize temporary options such as Parklets to provide areas of respite in the Downtown. (SEE LU-21 IN SPATIAL ACTIVATION & REGULATORY TOOLS)

**PS-9.** Prioritize the creation of a Festival/Greenway Street along the south portion of Main Street and continuing down to Civic Center as a means of better connecting the Downtown to the river parks. (SEE MASTER PLAN FRAMEWORK DIAGRAM)

- Leverage portal footers installed on Lewis Street during the 2018 CIP.

**PS-10.** Revisit past plans for Callender Street between 2nd & Main Street to be a key closeable civic space in the Downtown. (SEE 2009 LIVINGSTON STREETScape ENHANCEMENTS MASTER PLAN)

- Leverage portal footers installed on Callender Street during the 2018 CIP.

Incorporate Active Nature Play environments

Use underutilized lots as opportunities for short or long-term pocket parks

Concept of Callender as a key civic space from 2009 Livingston Streetscape Enhancements Master Plan

## PARKS & OPEN SPACE

Strategically placed street trees can maintain important view corridors while enhancing the street.

In the absence of street trees, seek opportunities to create shade in public spaces such as pocket parks.

Incorporating green infrastructure into the streetscape can beautify while also being functional.

### STREET TREES / LANDSCAPING / SHADE OPPORTUNITIES

**PS-11. Encourage trees, landscaped areas, furnishings, art and artistic elements, flexible shade structures, and other pedestrian amenities along streets and in all parks and public spaces.**

**PS-12. Utilize trees and landscaping as a way to visually connect the Downtown to Sacajawea Park, Miles Park and the Yellowstone River.**

**PS-13. Prioritize Street Trees in the short-term along the southern portions of Main Street to align with the Festival/Greenway Street concept, and along the east-west Side Streets in the Historic District.** (SEE MASTER PLAN FRAMEWORK DIAGRAM & FESTIVAL/GREENWAY STREET)

- Longer-term, revisit interest for street trees on the northern portion of Main in the Downtown, being sensitive to maintaining the iconic views from Park Street. Small trees or landscaping in movable, potted planters could be used to create shade in the short-term.

**PS-14. In instances where landscaping is difficult to grow/maintain, pursue physical art as an alternative.**

### NATURAL ENVIRONMENTS

**PS-15. Consider opportunities to incorporate green infrastructure and low impact development into parks and public spaces.**

- Consider bioretention areas and infiltration planters along the streetscape.
- Consider swales and rain gardens in parks.

**PS-16. Reduce stormwater runoff by employing nature-based solutions such as permeable surfaces and stormwater swales in pocket parks (not within the right-of-way).**

**PS-17. Protect natural habitats along Fleshman Creek, the Yellowstone River, & within the parks.**

**PS-18. For future levee improvements, minimize impacts to Yellowstone River habitats.**

**PS-19. Create a clear maintenance plan for downtown outdoor spaces to minimize the impact of such spaces on the natural environment.**

# ARTS & CULTURE

## PUBLIC ART & STORYTELLING

**AC-1. Visually connect spaces within the Downtown to the City's river, railroad, natural, and cultural heritage, including interpretive elements such as signage and public art that educate and engage people in Livingston's history.**

**AC-2. Invest in unique placemaking and Heritage Tourism elements and experiences that encourage locals and visitors to wander comfortably from The Depot area to the Yellowstone River.**

- Create an audio tour of the Downtown, including information about the history of the Livingston community, the railroad, the Historic District, the Yellowstone River, and the relationship to America's first National Park, and include QR codes at key locations such as the Chamber of Commerce & Visitor Information Center, the Depot, and the Yellowstone Gateway Museum.
- Consider creating a "passport" program of key destinations (i.e. the Yellowstone Gateway Museum, the Depot, etc.) within the Downtown Study Area that includes reduced admission and/or incentives to patronize local businesses.
- Develop an Art Walk along the 2nd Street Promenade that includes a variety of permanent and rotating

pieces, so that visitors and locals are enticed to take that route to Sacajawea & Miles Park from the Downtown. (SEE 2ND STREET PROMENADE)

**AC-3. Explore the opportunity for a Sculpture Park, or significant art area by the Civic Center to be enjoyed by locals and to be a draw of additional visitation and activation to Sacajawea & Miles Park.**

**AC-4. Seek additional opportunities to expand the Mural Program on blank facades within the Downtown. (SEE MASTER PLAN FRAMEWORK DIAGRAM)**

- Publish a Mural Tour brochure that can be distributed through hard copies and/or viewed on a mobile device.

**AC-5. Incorporate Public Art into key gateways into the Downtown (SEE WAYFINDING & GATEWAYS)**

**AC-6. Support the continuation of the monthly Artwalk and find ways to convey the economic impact potential to adjacent businesses.**

- Work with local businesses to create incentive programs and opportunities for cross-promotion at each of the galleries along the Artwalk.

Expand historical storytelling throughout the Downtown Study Area.

Blackfoot Pathways: Sculpture in the Wild installation at Tippet Rise Art Center in Lincoln, MT

Continue mural programming to enliven blank facades.

Populate the Downtown with amenities that appeal to all ages.

Temporary events in the Downtown help to keep the area vibrant while building community.

Extending the already successful Farmers Market into the Downtown on occasion could bring increased visitation to the Downtown.

## EVENTS & AMENITIES

**AC-7. Incorporate amenities within the Downtown for all ages, interests and abilities to help serve aging population needs, but also all users.**

**AC-8. Support temporary events, short-term activation, and the expansion of Downtown amenities on underutilized lots within the Downtown.**

- Eliminate regulatory barriers to facilitating temporary uses and/or activation.
- Establish a low-barrier to entry permit system for short-term activation.

**AC-9. Establish a transparent and predictable approval process for events to be held within the right-of-way that would require a temporary street closure.**

- Work with representatives from the BID and the Chamber of Commerce to establish a set of criteria to evaluate the economic benefits or challenges for adjacent businesses associated with a street closure for a temporary event.
- Require noticing to all businesses within 500' of an approved temporary street closure - at least two weeks in advance of the closure - so that staffing and/or marketing adjustments can be made by local businesses.

**AC-10. Consider creating a semi-permanent Food Truck space at Depot Park and along the Festival/Greenway Street.** (SEE REGULATORY TOOLS AND FESTIVAL/GREENWAY STREET)

**AC-11. Consider extending the Farmers Market along the Festival/Greenway Street portion of Main and River Drive, when implemented.**

**AC-12. Incorporate recreational amenities along the riverwalk trail, such as outdoor fitness stations and picnic areas.**

**AC-13. Encourage citywide and local business participation in community building events, such as the annual MLK Day of Service.**

**AC-14. Find opportunities to support public art contests/exhibits to leverage the strength of the local artist scene and provide increased visibility to local art talent and entrepreneurs.**

- An annual, themed temporary sculpture contest can be a way to build anticipation for locals and visitors and increase visitation in the Downtown.

# ECONOMIC DEVELOPMENT & HOUSING

## ECONOMIC DEVELOPMENT

### ED-1. Attract and support businesses that add to the diversity of retail offerings, promote the entrepreneurial community, and provide goods and services that are needed by both residents and visitors.

- Attract and support retailers that provide everyday goods and services for residents such as fresh foods, convenience goods, and apparel.
- Identify and support the use of temporary businesses (e.g. food trucks or pop-up stores) that can help supplement demand during the peak visitor season.

### ED-2. Provide and support a vibrant public realm and needed visitor and shopper amenities that can allow businesses to thrive.

- Orient parking rules and standards to encourage greater turnover of street parking and provide long-term parking options on the edges of the retail core of the Downtown. Continue recent parking enforcement efforts to ensure visitors and shoppers can find parking options within a block or two of their destination.
- Fund public improvements that enhance the visitor experience such as public restrooms, EV infrastructure, gathering spaces, outdoor seating, and beautification.

- Identify resources and capacity that can add to the services provided by the Business Improvement District.
- Require active ground floor uses along Main Street within the Downtown.

### ED-3. Support new development and adaptive reuse of old buildings for uses that help support businesses and diversify the seasonality of visitors.

- Attract more hotel and lodging options in the Downtown including a new hotel and use of upper floor spaces for short-term rental units when cost prohibitive for long-term rentals.
- Support events and programs that attract visitors from the surrounding region during non-peak months.
- Support new housing development in the Downtown that is available to the local workforce.

The restored Grabow Hotel, provides high-quality, upper floor lodging to visitors of the Downtown.

## DOWNTOWN SNAPSHOT

Businesses in Downtown Livingston are supported through multiple partner organizations. The Downtown Businesses formed a business improvement district to help with beautification, events, and marketing of downtown. The City's Urban Renewal Agency (URA) has its only tax increment district within the Downtown that can be a powerful tool to attract investment to the area. The Downtown Study Area has a unique mixture of businesses which are predominantly locally owned. This unique mixture creates a charm and draw for visitors. As a result, there is strong visitation in high tourism, summer/fall months to support businesses, however consistent demand in winter/spring off-seasons is more challenging and presents issues for business viability. Many businesses are challenged with hiring and retaining enough workers to support consistent, seven-day per week hours, even in busy months. Housing affordability, lack of mobility options, declines in workforce participation from younger residents have made worker availability a major challenge. Despite these challenges there is an opportunity to continue to diversify the business mix in the Downtown and grow off-peak demand.

# ECONOMIC DEVELOPMENT & HOUSING

## ED-4. Use the powers of the URA and tax increment to support reinvestment in existing buildings, attract people Downtown, and provide amenities to support vitality in the Downtown.

- Use tax increment as a funding support tool - with a focus on enhancing affordability - and not the primary funding source for projects. Set target percent for total URA funding as a percent of total project cost.
- Continue to provide URA grants for facade repair and building renovations that support existing businesses and property owners in the Downtown.
- Utilize tax increment funding to support the creation of residential units in the Downtown with a focus on existing building rehabilitation and creation of new workforce housing.

The original JCPenney building provides an example of successfully, and well-executed adaptive reuse.

- Utilize a portion of tax increment to support small scale projects that enhance public realm or support creation of public gathering spaces.
- Consider support for large scale development projects on a case-by-case basis requiring projects prove the project will only occur “but for” inclusion of Tax Increment Financing. Limit increment invested in projects to the amount generated by the project and require the project to provide a needed community benefit.

## HOUSING

### H-1. Encourage the development of new housing options in the Downtown to bring increased vitality.

- Allow greater flexibility for middle density housing and/or appropriately scaled Live-Work units in residential areas in the Downtown Study Area.
- Attract more long-term rental housing options in the Downtown. (SEE PRIORITY INFILL/REDEVELOPMENT SITES & HOUSING DEVELOPMENT.)

### H-2. Proactively seek opportunities to create new housing units in the Downtown that are oriented and affordable to the City’s workforce.

- Provide regulatory and financial support and incentives for the

development of housing that is oriented towards the City’s workforce which is defined as renter households earning less than 80% of AMI and owner households earning less than 120% of AMI.

### H-3. Identify publicly-owned sites that can be reused/redeveloped for housing.

- Consider the use of publicly-owned land that is currently underutilized by allowing for development housing on these sites.
- Work with other governmental partners, such as Park County, to identify publicly-owned sites in the Downtown that might be developed for housing or a mixture of uses that can accommodate public needs and allow for new housing.

### H-4. Encourage the adaptive reuse of existing buildings into housing units and provide support for adaptive reuse projects that create housing oriented to the City’s workforce.

- The building stock in the downtown provides a unique character given its age and design but many of the buildings are in need of repair and outmoded for potential uses. Reinvestment in these buildings is needed and housing provides the most promising potential for reuse outside of well-located retail buildings.

### TOPICS IN THIS CHAPTER:

- Regulatory Tools
- Priority Infill/ Redevelopment Sites
- Housing Development
- Streetscape Improvements
- Wayfinding & Gateways
- Parking Management

### CATALYTIC PROJECTS & INITIATIVES

In addition to the more flexible guidance contained in the Chapter 2: Master Plan Framework Recommendations, this chapter highlights specific projects and initiatives that can further guide the City's work program in implementing the community vision for the Downtown. Many of these more detailed, implementation-oriented projects and strategies will take time to see through to completion, as they are more resource-dependent initiatives. Each can benefit greatly, however, from the support of community champions and partners, and by focusing on a phased approach to implementation over time.

For each project or initiative in this chapter, short-term actions (1-2 years), medium-term actions (2-5 years), and long-term actions (5-10 years) have been identified. The matrix included at the end of the chapter provides a consolidated look at each effort's timeframe, potential champions, partners and funding sources, and an indication of the relative order of magnitude cost.

### A RECOMMENDATION ON DOWNTOWN MASTER PLAN UPDATES

While this Downtown Master Plan is intended to provide guidance to the City on implementing the community's 20-year vision for the Downtown, there are - as always - unanticipated opportunities and challenges that will arise in the next two decades. Therefore, in an effort to extend the shelf life of this Downtown Master Plan document, it is recommended that the City assess its progress toward implementation at a regular interval (2-5 years). At that time, the City should consider making **responsive, strategic updates** to the Plan to optimize its ability to implement the community's vision, rather than invest the time and resources in a wholly new Plan.

# REGULATORY TOOLS

The introduction of, or refinement to, regulatory tools in the Downtown is an implementation action item that often provides less immediate physical change than a more catalytic project investment, but its impact can be wider-reaching and more comprehensive.

With an update to the City's Zoning Code on the horizon, many of the included actions for this topic are considered short-term, as they could happen concurrent with that update effort. The following recommendations and strategies provide guidance that the City of Livingston can use in refining its regulatory tools to more clearly communicate to private property owners the community's desired look and feel of Downtown. Regulatory documents, such as the City's Municipal Code, its Chapter 30 Zoning Ordinance, and Design Guidelines can be important tools in cultivating and curating the desired character and mix of uses in the Downtown.

## SHORT-TERM ACTIONS (1-2 YRS)

- **Establish a maximum height for key portions of the current Central Business District (CBD) zone district (See map at right).**
  - \* Explore form-based zoning in a select portion of the Downtown area to ensure development and redevelopment supports a desired context-appropriate massing.

- **Reconsider the appropriateness of the Highway Commercial zone district designation in the Downtown area.**

- \* The permissiveness of auto-oriented uses in the Highway Commercial Zone District works against stated community priorities of a more walkable, pedestrian-focused Downtown environment that is compatible with the historic character of the commercial core.

- **Consider form-based zoning and/or Downtown Design Standards & Guidelines to promote greater design compatibility with the community's stated vision for the Downtown.**

- \* Although the Building Design Standards exist in the Zoning Code, they are not currently applicable to the Downtown Study Area.

- **Create a Design Standards and Guidelines document applicable to the Historic District, to be administered by the Historic Preservation Commission (HPC) to guide redevelopment in the historic core that is better aligned with the community vision.**

- \* Created in 1982, the Historic District Overlay Zoning Ordinance formed the HPC, and created its intents and purposes. Guidance today, however, is applied by using the U.S. Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings, and the area would benefit from more customized and predictable guidelines uniquely applicable to Livingston.

Map of areas recommended for height restriction guidance and/or form-based code application.

Example of Downtown Form-based Code Requirements

Succinct Historic Building Design Standards with visual examples promote more predictable outcomes.

Cafe seating in Helena facilitated through use of a parklet.

Great Falls' "pedlet" approach to maintaining a clear path of circulation and accommodating cafe seating.

A consistent area for lunchtime food trucks can help increase activity in the Downtown.

- **Consider amending the Municipal Code to ensure alignment with a desire to create a more active pedestrian experience along key corridors such as Main Street, 2nd Street, & B Street, and along east-west Streets from Park Street to Geyser Street.**

- \* Promote the allowance of cafe seating for ground floor restaurant uses without overly restrictive requirements on the ground floor tenant.
- \* Maintain at least 6' of continuous clear space on the sidewalk for pedestrian circulation.
- \* Where adequate sidewalk space does not exist, encourage the use of Parklet or "Pedlet" spaces to facilitate the outdoor dining use.

- **Consider amending the Municipal Code to allow Food Trucks, and other means of temporary activation in the Downtown Area to have a more stable presence.**

- \* Section 17-4.6 of the code limits "Sidewalk Vendors" to no more than four hours in any eight-hour period at one location, and considers one location the parking of a vehicle or other movable entity within 300 feet of the original location.
- \* Consider identifying specific areas within the Downtown - i.e. the Depot Park, or specific underutilized or vacant lots, etc. - where longer durations can be allowed to support activity over multiple mealtimes (breakfast-lunch; lunch-dinner) and equip such areas with power and water hookups.

## REGULATORY TOOLS

- \* A predictable location with weekly or seasonal variety in the vendor offerings can help to entice residents and those passing through town to stop and attract patronage to other businesses in the Downtown during their visit.
- **Review the Municipal Code - and solicit input from the local development community - to identify opportunities to provide regulatory relief, density bonuses, and/or expedited processing for desired building forms.**
- \* At this time, consider aligning those regulatory incentives with financial incentives, such as gap-funding support from the URA.

### MEDIUM-TERM ACTIONS (2-5 YRS)

- **Convene a Developer's Roundtable and consider additional incentives for land uses within the Downtown not seeing the desired growth.**
- \* Maintain an annual inventory of new development/redevelopment and the corresponding land uses being introduced to the Downtown.

# PRIORITY INFILL / REDEVELOPMENT SITES

Downtown Livingston already benefits from a rich character and vibrant environment. In order to retain that vibrancy as the City evolves, highlighting investment opportunities within the Downtown, while aligning them with the community's desired uses is key to fostering an environment that delivers on the community's vision for the Downtown. A desire to diversity the mix of uses in the Downtown and strengthen connections to existing assets can be furthered through well-considered and strategic Infill and Redevelopment.

While Downtown's greatest need, as stated by the community in this process, was housing - specifically at an attainable price point for the workforce (See Housing) - other uses that contribute to the vitality of, and activity in, Downtown are also of tremendous value.

Eight development opportunity sites were identified in the Downtown area through this process as community priorities for attracting compatible infill and redevelopment. Those opportunities, along with an illustration of all Underutilized Parcels / Opportunity Sites within the Downtown area are shown on the map on the following page.

## SHORT-TERM ACTIONS (1-2 YRS)

- Focus business and investment attraction efforts to align with the following, which is an indication of the

desired community uses for each of these eight sites:

- 1 Corner of Main St. & Front St.**
  - \* Desired Uses - Corner Store, Housing
- 2 Parking Lot behind Murray Hotel**
  - \* Desired Uses - Housing/Mixed-Use Retail; Hospitality
- 3 Publicly-owned Parking Lot adjacent to Lincoln School**
  - \* Desired Uses - Housing/Mixed-Use; Hospitality; Park/Open Space
- 4 Mid-block parcel on 2nd Street between Lewis St. & Clark St.**
  - \* Desired Uses - Housing/Mixed-Use Office
- 5 Former Industrial Towel Site**
  - \* Desired Uses - Housing/Mixed-Use
- 6 SE Corner of Clark St. & Main St.**
  - \* Desired Uses - Housing/Mixed-Use; Dining
- 7 Former NW Energy Property**
  - \* Desired Uses - Housing
- 8 Former Livingston Enterprise Property**
  - \* Desired Uses - Multi-Generational Space; Arts Space; Hospitality

## MEDIUM-TERM ACTIONS (2-5 YRS)

- Explore incentives, such as the use of TIF, other public funding, expedited review, or waived/reduced development fees to mitigate gaps in vision-aligned development concepts.

## WHAT ARE UNDERUTILIZED PARCELS / OPPORTUNITY SITES?

This map on the following page illustrates an analysis performed on all parcels within the Downtown Master Plan study area. The intent is to "flag" the parcels that are most likely suited/ susceptible to redevelopment from a market standpoint, in an effort to spark a more deliberate community conversation about the opportunities these sites present in helping to achieve the community's vision for Downtown Livingston.

The highlighted parcels on the map meet one or more of the following indicators that signal either underutilization and / or greater development opportunity (graphic representation shown in the legend):

- Publicly Owned Parcels
- Vacant Parcels
- Parcels with building square footages that are less than 25% of the size of the lot ("Low Floor Area Ratio Parcels")
- Parcels with Land Value that is 2Xs (or more) the value of the building(s) on the lot

# Housing Development

## Feasibility Analysis

The feasibility of housing development in Downtown Livingston was analyzed to support the Downtown Master Plan. Potential housing types that are likely in demand in Downtown Livingston include multifamily condominium units, multifamily rental units, and for-sale townhomes. The feasibility of these housing product types were analyzed considering Downtown conditions (e.g. land prices, allowable density, and likely available development sites). The analysis identified that:

- All three of the housing prototypes tested did not generate sufficient returns to indicate they are feasible as modeled, which means financial support may be needed to attract significant new housing to downtown especially for housing affordable to the City's workforce.
- Medium to large scale vertical mixed use housing projects (i.e. greater than 20 units) will be a challenge to develop in the near future due to the feasibility gaps. Therefore, the attraction of condos and/or luxury housing units will need to be accommodated through smaller projects likely involving adaptive reuse of existing buildings.
- The City would benefit from increased housing options in Downtown that are affordable to the city's workforce. New multifamily rental units and for-sale townhomes would provide increased options, but there are some feasibility gaps that may be addressed through use of regulatory and financial tools. Proactive efforts by the City, URA, and other partners can lead to the development of these types of projects.

## Feasibility Analysis & Modeling

Based on the Housing Study that was completed as a part of this Downtown Master Plan process (See Appendix), and informed by additional outreach to the development/real estate community in Livingston, three housing prototypes were identified that are likely supportable in the Downtown.

The consultant team tested the feasibility of the following three prototypes - aligning with the housing types most likely in demand in the Downtown - on an example redevelopable lot in the Downtown Study Area, with detailed proforma modeling and conceptual building massing.

An "at-a-glance" summary of those results is included on the following page, but more detailed information can be found in the Housing Study which is included in the Appendix of this Downtown Master Plan.

| Option 1                                          | Option 2                                  | Option 3                             |
|---------------------------------------------------|-------------------------------------------|--------------------------------------|
| 4-Story Mixed-Use Condo (Behind the Murray Hotel) | 3-Story Walk-Up Apartment (NW Energy Lot) | 3-Story Townhomes (Front Street Lot) |
| Mixed-Use                                         | Mixed-Use                                 | Mixed-Use                            |
| 4-Story                                           | 3-Story                                   | 3-Story                              |
| Parking Garage                                    | Tuck Under / Surface                      | Tuck Under / Surface                 |

# HOUSING DEVELOPMENT

4-Story; Mixed-Use Condo Massing Diagram

## 4-STORY MIXED-USE CONDO

The 4-story, mixed-use condominium building prototype consists of 24 residential units, including 4 penthouses, 3,000 square feet of ground floor retail space, and a parking garage with 30 spaces (a ratio of 1.25 spaces per unit). The average unit size is 2,200 square feet for penthouse units and 880 square feet for the other residential units. The net leasable building area is 26,400 square feet, and the gross building area is 29,520 square feet.

| PROJECT RETURN AND GAP |              |
|------------------------|--------------|
| PROJECT COST           |              |
| Total Cost             | \$15,851,924 |
| Per GBA                | \$487        |
| Per Unit               | \$660,497    |
| STATIC EVALUATION      |              |
| Return on Cost         |              |
| Total Project Value    | \$15,000,289 |
| Total Project Cost     | \$15,851,924 |
| Project Return         | -\$851,635   |
| Return on Cost         | -5.4%        |
| Target                 | 12.0%        |

Source: Economic & Planning Systems

3-Story Walk-Up Apartment Massing Diagram

## 3-STORY WALK-UP APARTMENT

The 3-story apartment building prototype contains 42 rental units with an average unit size of 755 square feet. Parking includes 30 surface parking spaces and 22 tuck under spaces (a ratio of 1.24 spaces per unit). Out of the three development prototypes, this option was tested on the largest lot size. The building's gross area is 37,300 square feet, with a net leasable area of 31,705 square feet.

| PROJECT RETURN AND GAP |              |
|------------------------|--------------|
| PROJECT COST           |              |
| Total Cost             | \$12,366,086 |
| Per GBA                | \$332        |
| Per Unit               | \$294,431    |
| STATIC EVALUATION      |              |
| Return on Cost         |              |
| Total Project Value    | \$12,218,187 |
| Total Project Cost     | \$12,366,086 |
| Project Return         | \$963,408    |
| Return on Cost         | 8.6%         |
| Target                 | 12.0%        |

Source: Economic & Planning Systems

3-Story Townhomes Massing Diagram

## 3-STORY TOWNHOMES

The third housing prototype analyzed includes 12 for-sale townhomes (with an average unit size of 1,667 square feet). These townhouses, located on a corner lot site, are 3-stories each with tuck under parking. The development has a gross area of 20,000 square feet, and since these are townhouse units, the net leasable area is also 20,000 square feet.

| PROJECT RETURN AND GAP |             |
|------------------------|-------------|
| PROJECT COST           |             |
| Total Cost             | \$5,411,314 |
| Per GBA                | \$271       |
| Per Unit               | \$450,943   |
| STATIC EVALUATION      |             |
| Return on Cost         |             |
| Total Project Value    | \$5,760,000 |
| Total Project Cost     | \$5,411,314 |
| Project Return         | \$348,686   |
| Return on Cost         | 6.4%        |
| Target                 | 12.0%       |

Source: Economic & Planning Systems

# STREETSCAPE IMPROVEMENTS - 2ND STREET PROMENADE

One of the most consistently expressed and supported Downtown improvement desires in this process was to create a clear and safe non-motorized connection from the Downtown core to the river parks (See Master Plan Framework Diagram and Streetscape & Mobility Recommendations). The 2nd Street Promenade would transform 2nd Street into a vibrant and active pedestrian and cycling corridor, with a dedicated facility on the east side of the roadway, providing residents and visitors with an engaging and comfortable route to and from Sacajawea & Miles Park's Yellowstone River frontage and the Downtown commercial core.

## SHORT-TERM ACTIONS (1-2 YRS)

- **Pilot the 2nd Street Promenade along the existing streetscape, with lower cost means of implementation, and during the summer months, when maintenance needs of the streetscape are lessened.**
- \* Prioritize short-term implementation of the 2nd Street Promenade concept from Callender Street to Butte Street, providing a direct connection from the core of the Downtown to the entry point of River Drive, bringing users more safely to the river parks, recreational, and school uses along the riverfront. (SEE SCOPE DIAGRAM ON FOLLOWING PAGE)
- \* Lower cost implementation methods would include restriping of the

roadway to more efficiently delineate the two existing travel lanes, flanked by parallel parking, while freeing up 10' of space on the east side of the roadway to facilitate a multimodal facility. (SEE PROPOSED CYCLE TRACK CONFIGURATION ON FOLLOWING PAGE.) The 10' would include 8' of clear space for bicycle and pedestrian use, along with a 2' buffer, that would include the installation of flexible delineator posts to provide vertical separation between parked cars and the facility.

- \* To further visually distinguish the multimodal facility from the roadway the City could work with community groups, Park High School, etc. to paint murals along the facility and/or at intersection crossing locations.

- **Install pedestrian counters at key locations along the pilot project to track the use of the facility by the community, and to better understand peak days/times.**
- \* These data points can be useful in customizing the final design of the facility to more closely align with user needs (i.e. demand for enhanced lighting, if peak use is in the evenings; demand for more shade, if peak use is midday, etc.).

## MISSOULA GARDENWALK NEIGHBORWAYS PILOT PROJECT

Led by Common Good Missoula, the Gardenwalk Neighborways pilot project is a grassroots effort to address street safety and connectivity which grew out of Common Good Missoula's listening sessions and organizing efforts over the past two years. Building on the City's existing network of neighborhood greenways, Neighborways would reallocate a portion of existing street pavement and add barriers and striping, providing a safe, connected corridor across the city exclusively designated for pedestrians, cyclists, and wheelchair users. The aspiration is that based on a successful pilot project, Gardenwalk Neighborways could be implemented elsewhere in the City.

Recommended Scope of Pilot Project

Existing Configuration on 2nd Street (Looking South)

Proposed Cycle Track (Pilot Project) Configuration on 2nd Street (Looking South)

# STREETSCAPE IMPROVEMENTS - 2ND STREET PROMENADE

Diagram of Proposed 2nd Street Right-of-Way Allocation in 66' Right-of-Way Section

## MEDIUM-TERM ACTIONS (2-5 YRS)

- Secure funding to realize the 2nd Street Promenade as a permanent streetscape improvement, with a 10' wide grade-separated pedestrian and bicycle facility, with curb-extensions at intersections.

\* Clearly demarcate the 10' wide facility with colored concrete or decorative paving to distinguish it from the adjacent sidewalk.

## LONG-TERM ACTIONS (5-10 YRS)

- Maintain and refresh the look and feel of the 2nd Street Promenade, creating year-round visual interest and providing reasons for the community to visit the 2nd Street Promenade beyond using it for its safe connections.
- Establish an Art Walk along the Promenade, with a mix of permanent and rotating sculptural art that will encourage pedestrians to walk along the Promenade down to the River and back. (SEE MASTER PLAN FRAMEWORK DIAGRAM)

Proposed 2nd Street Promenade Configuration (Looking South)

Conceptual Rendering of a portion of 2nd Street Promenade (Looking North)

# STREETSCAPE IMPROVEMENTS - FESTIVAL / GREENWAY STREET

## S. MAIN STREET FESTIVAL / GREENWAY STREET

The northern portion of Main Street within the Downtown is the most vibrant and iconic portion of the historic core, as the uses along the street are inherently more active uses, with a mix of retail/commercial, and eating and dining establishments. South of Clark Street along Main Street, however, the majority of uses are less active. Throughout this planning process, there was also a stated desire to find opportunities for more shade and street trees in the Downtown environment. Adding street trees to the northern portion of Main Street, however, could obscure views of the mountains and the historic architecture of the existing buildings.

Therefore a streetscape redesign is envisioned for the portion of Main Street extending from Clark Street south to River Drive and extending to the location of the Public Pool. This section of streetscape provides the opportunity to add street trees and extend the aesthetic of the river parks northward into the Downtown.

## SHORT-TERM ACTIONS (1-2 YRS)

- Allow this portion of streetscape to be more easily closeable for events and enhance the streetscape with low-cost seasonal planters, public art, temporary lighting, parklets, etc.

## MEDIUM-TERM ACTIONS (2-5 YRS)

- Encourage infill development along the streetscape and tree planting to infuse it with more consistently active uses and shade.

## LONG-TERM ACTIONS (5-10 YRS)

- Secure funding to realize the Festival/Greenway Street as a permanent streetscape improvement with enhanced amenities (noted at right).

Recommended Scope of Festival/Greenway Street

## VALUE OF A CLOSEABLE, EVENT STREET

Having a portion of a streetscape that is designed with enhanced amenities and closeable to vehicles with greater ease - special lighting and landscaping geared toward pedestrians, integrated power for event usage, strategically located water and sewer hookups, a circulation plan to maneuver around the closed street, etc. - can help establish a place within the Downtown for community gatherings to occur. The streetscape can function as a typical street during non-event times, but when activated by an event, it can bring increased visitation and vibrancy to the Downtown environment. Such investment in the streetscape can also help to encourage private investment in infill development and/or adaptive reuse of existing structures into more active ground floor frontages.

Conceptual Rendering of a portion of the Festival / Greenway Street (Looking North)

# STREETSCAPE IMPROVEMENTS - PARK STREET IMPROVEMENTS

## SHORT-TERM ACTIONS (1-2 YRS)

- **Prioritize curb extensions/bulb-outs to shorten the crossing distance for pedestrians across Park Street at the intersections of Park Street & Main Street, and Park Street & 2nd Street.**
- \* A planned RRFB will be a great improvement at the intersection of Park Street and Main Street, and another should be explored for the intersection of Park Street and 2nd Street.
- \* Consider painted intersection and/or crosswalk treatments to further visually reinforce the priority for safe pedestrian crossings at those key intersections.
- \* Curb extensions / bulb-outs should be designed with gentler turning radii

and/or flattened curbs (SEE WHITEFISH, MT EXAMPLE ON PAGE 31), to help avoid damage from turning trucks.

- \* While curb extensions/bulb-outs at these locations will help to establish visual gateways into the Downtown, consider adding public art and/or wayfinding signage at these locations to further distinguish these intersections as key connections.

## MEDIUM-TERM ACTIONS (2-5 YRS)

- **Work with the Montana Department of Transportation (MDT) to conduct a Corridor Study for Park Street, focused on opportunities for enhanced connectivity and pedestrian safety improvements.**

- **Encourage Infill Development or Redevelopment along Park Street to include active ground floor uses, and keep the number of curb cuts into the pedestrian environment at a minimum, requiring alley access to uses along Park Street within the Downtown Study Area, when possible.**

## LONG-TERM ACTIONS (5-10 YRS)

- **Implement Corridor Study recommendations along Park Street, including a safer pedestrian crossing at the intersection of Park Street and 2nd Street, and provide more accessible pedestrian infrastructure on the north side of Park Street.**

Diagram of Recommended Streetscape Improvements

Conceptual Rendering of Potential Park Street Improvements (Looking East)

Conceptual Rendering of Potential Park Street Improvements (Looking West)

# WAYFINDING & GATEWAYS

## PRIORITY WAYFINDING & GATEWAY LOCATIONS & TREATMENTS

An improvement to the Downtown environment commonly requested in this planning process was the addition of additional Gateway Treatments at perceived key “entry points” into the Downtown, that could both enhance wayfinding and signal to visitors of Livingston the proper paths of travel to key destinations. Enhanced wayfinding is an excellent way for the City to capitalize on its tremendous Heritage Tourism potential. There was a great deal of support in the Downtown for using Public Art and enhanced landscaping, when possible, at these Gateway Treatments, in order to extend beyond signage-only treatments.

## SHORT-TERM ACTIONS (1-2 YRS)

- Consider creating a unified aesthetic for wayfinding signage both Citywide and within the Downtown. While they can share similar aesthetic attributes, such as color, typeface, etc., the scale of signage and destinations to which they are orienting should be different.
- Prioritize wayfinding at key entry points into and out of the Downtown area, particularly along Park Street, nearby the schools, and into and out of the river parks. (SEE DIAGRAM OF PRELIMINARY RECOMMENDATIONS ON THE FOLLOWING PAGE.)
- \* Orient the public to key destinations from these locations such as - the Downtown Historic District, Shopping & Dining, Main Street, the Yellowstone Gateway Museum, the Yellowstone River, Sacajawea & Miles Parks, the Chamber of Commerce & Visitors Center, the Shane Lalani Center for

the Arts, the Depot Center, Park High School, the Park County Fairgrounds, the Livingston Golf & Country Club, and Mayor’s Landing.

## MEDIUM-TERM ACTIONS (3-5 YRS)

- Explore the viability of additional signage - potentially of a more billboard/advertisement nature - along I-90 to announce the approach to the City of Livingston and encourage greater visitation to and patronage within the Downtown.

## LONG-TERM ACTIONS (5-10 YRS)

- Carefully consider potential roadway changes, such as enhancements to, or better defined non-motorized trail connections adjacent to roadways at key Gateways to further signal entry points into the Downtown. Combine with Signage, Public Art, and/or Landscaping, when possible.

## TYPES OF WAYFINDING SIGNAGE

In conversations with the community about the types of Wayfinding signage that would be desirable for the Downtown, there was consensus on trying to minimize the visual clutter of signage, while more accessibly directing visitors and locals to key destinations near the Downtown. There was also a desire to communicate the distance to those locations in the amount of time it would take to walk, bike, roll, etc. to the destination, rather than a measurement of the distance. When distance is used, there was a greater interest in communicating the number of blocks rather than distance in feet or miles.

Diagram of Preliminary Wayfinding Signage Priority Locations and Key Destination Pairings

# PARKING MANAGEMENT

## RIGHT-SIZING PARKING NEEDS

All downtown environments benefit from regular reflections on how to better manage their parking needs and right-size an approach based upon the level of demand by the existing and envisioned uses in the Downtown.

Utilization data collected as a part of this Downtown Master Plan effort (See Parking Study in the Appendix) indicated that there were few occasions where parking areas were more than 90 percent utilized, meaning that most of the time, drivers should be able to find parking at or near their desired destination. Only select locations consistently had utilizations near or at capacity, most notably along Main Street between Park and Lewis Streets. Field observations and stakeholder input indicate that turnover is relatively low and that parking spots are often occupied for the full two-hour time allotment. Since enforcement was increased in 2023, turnover and compliance have been noted to improve.

During public and stakeholder meetings, there was mixed opinion on if additional parking was needed or if improved management strategies would help alleviate the concerns. Some expressed a desire for additional surface parking, or a parking structure, within the Historic District where parking utilization is highest.

Given the high cost of adding surface parking, it is likely more feasible to focus on improving the existing system through management and “right-sizing” strategies, such as the following:

### SHORT-TERM ACTIONS (1-2 YRS)

- **Modify time restrictions for existing on-street parking** (SEE DIAGRAM OF RECOMMENDATIONS ON FOLLOWING PAGE)
  - \* Shorter time spaces (an hour or less) are most effective in areas with high utilization and quicker turnover. These include drop-off, pickup, and loading zones as well as quick service dining and retail locations. Mid-term parking zones (~2 hours) are most common across downtowns and are typically adequate for the majority of patrons. These zones allow enough time for most retail shopping and dining activities. Long-term parking areas (greater than 2 hours) are needed for certain locations that require longer appointment times, meetings, or special uses. These are typically located on the periphery of the downtown area due to their lower turnover rates.
- **Explore agreements with owners of private parking lots to make use of available parking outside of business use (i.e. evenings, weekends, etc.)**
  - \* City should provide signage indicating when the parking is available to the public.

- **Create an employee parking permit system to ensure convenient employee parking while leaving parking available for potential patrons.**

\* Surface lots and city blocks that are currently unrestricted or currently underutilized could be allocated for the use of employees with proper permits.

### MEDIUM-TERM ACTIONS (3-5 YRS)

- **Explore paid parking options.**
  - \* Although the city generally desires to avoid paid parking, it can be an effective management strategy to consider in the future. Paid parking can include incentive programs, utilize rates that influence driver behavior, and encourage the reduction of single occupancy vehicles or the use of alternate modes of transportation. Additionally, revenues from paid parking can help support parking operations, required staffing, and ongoing maintenance, creating a sustainable parking management strategy.

### LONG-TERM ACTIONS (5-10 YRS)

- **Consider integrating a public parking structure into a mixed-use development.**
  - \* Though expensive, if other parking management strategies prove unsuccessful, the City could consider pursuing a dedicated structure; ideally incorporated into an infill development with other downtown-supportive uses.

Diagram of Recommended Time Restriction Modifications

# IMPLEMENTATION MATRIX

The implementation matrix provides a consolidated look at each effort's timeframe, applicable sections of this Downtown Master Plan, potential champions and/or key partners, potential funding sources, and an indication of the relative order of magnitude cost.

NOTE: For each of the recommendations that follow, the City will need to coordinate and adhere with state and federal standards for on-system routes - a category of roads that are updated annually by the Montana Department of Transportation (MDT).

SEE PAGE 65 FOR DEFINITIONS OF ELEMENTS USED IN THIS IMPLEMENTATION MATRIX, INCLUDING THE INTENDED DISTINCTION BETWEEN "POTENTIAL CHAMPION" AND "KEY PARTNER."

| KEY SCOPE ELEMENTS OF IMPLEMENTATION EFFORT                                                                                                      | TIMEFRAME                  | APPLICABLE MASTER PLAN SECTION(S)                                                                                                                                                                                                                                                         | POTENTIAL CHAMPIONS/ KEY PARTNERS                                                                                                                              | POTENTIAL FUNDING SOURCES                                                                                                                                                                     | ORDER OF MAGNITUDE COST |

## DEFINITION OF ABBREVIATIONS AND TERMS USED IN IMPLEMENTATION MATRIX

The distinction between “champion” and “partner” in this Implementation Matrix typically implies that a project “champion” is advocating for and supporting implementation, whereas a project “partner” may have approval authority over the project and/or a direct financial or physical stake in its implementation.

- HPC = Historical Preservation Commission
- LBID = Livingston Business Improvement District
- LDBOBA = Livingston Downtown Building Owners and Business Association
- LU Board = Land Use Board
- MDT = Montana Department of Transportation
- PCEC = Park County Environmental Council
- TIF = Tax Increment Financing
- URA = Urban Renewal Agency

- \$ = ~ < \$50,000
- \$\$ = ~ \$50,000 - \$200,000
- \$\$\$ = ~ \$200,000 - \$750,000
- \$\$\$\$ = ~ > \$750,000

**SECTION IN THE APPENDIX:**

- Community Engagement Catalog
- Housing Study
- Parking Study

## SUPPORTING AND TECHNICAL DOCUMENTS

The Appendix to this Downtown Master Plan contains longer-form supporting and technical documentation to provide valuable background information that was used to inform the various plan recommendations, strategies, catalytic projects and initiatives found throughout the Plan.

The Community Engagement Catalog is a collection of images and compiled inputs highlighting the feedback received from the community throughout the process. In instances where recommendations would benefit from a more nuanced understanding of the intent(s) expressed by the community, this compilation of data can be a useful resource.

The Housing Study - including its Feasibility Analysis component - and the Parking Study can be utilized as standalone documents to inform other work program elements or initiatives that the City may be working on. For the purposes of the Downtown Master Plan, however, the technical analysis and data contained in these documents played an instrumental role in having more nuanced conversations with community members around how to best to implement their vision(s) for the Downtown, as well as informing the most effective steps that need to be taken to do so.

## Preliminary Visioning Survey – Results Summary

---

- **391 Participants**

- **Key Takeaways:**

- Majority of participants were Livingston residents who spend time in the Downtown daily or weekly
- About 1/3 of participants indicated that they live and/or work in Downtown
- About 70% of participants indicated that Shopping & Dining are what bring them to Downtown most often, reinforcing an emphasis on entertainment in the Downtown
  - Events were also a strong draw for visitors, whereas Events and “Socializing with my community” were roughly equivalent for residents

## Preliminary Visioning Survey – Results Summary

---

- **Key Takeaways (*continued*):**

- Consistent themes in the open-ended responses included:
  - **Favorite Part of Downtown:**
    - A strong emphasis on the community, as well as an appreciation of the history/historic architecture/main street character & charm in the Downtown
  - **Vision for Downtown:**
    - Reinforcing the favorite part of Downtown, a desire to maintain and preserve the community and character, while making it more vibrant and accessible (including from a parking standpoint)
  - **One thing to improve:**
    - Parking was the most frequent response, with safety, diversity of shopping options, and additional green space/trees also very frequently mentioned.
    - “Nothing” was also a popular response, reinforcing the desire to maintain and preserve the character of the Downtown.

## Preliminary Visioning Survey – Results Summary

- Of the 391 Participants:

## Preliminary Visioning Survey – Results Summary

- **Residents** (of Livingston and/or Park County):
  - How often do you spend time in Downtown Livingston?

# COMMUNITY ENGAGEMENT CATALOG

## Preliminary Visioning Survey – Results Summary

- **Residents (of Livingston and/or Park County):**
  - What brings you to Downtown Livingston most often? *(Select all that apply)*

## Preliminary Visioning Survey – Results Summary

- **Visitors** to Downtown Livingston from outside the County:
  - How often do you spend time in Downtown Livingston?

- **All Participants:**

- If you could improve one thing about your experience in Downtown Livingston, what would it be?

- Sampling of Responses with Consistent Themes:

## Preliminary Visioning Survey – Results Summary

- Sampling of Responses with Consistent Themes *(continued)*:

Accessibility  
via bikes,  
walking,  
wheelchair, etc.

Safety,  
especially as  
a pedestrian  
or cyclist;  
bike routes  
and lanes

More  
affordability  
(housing &  
dining)

Rental housing  
for employees  
so that  
restaurants can  
stay open more  
than 3 days a  
week!

More trees  
and green  
space

Livingston is  
a quaint small  
town. Needs  
to stay that  
way . . .

It's  
perfect  
now. Don't  
screw it  
up!

Convenient  
and  
available  
parking

Reduce the  
number of  
art galleries

## Preliminary Visioning Survey – Results Summary

- **Residents** (of Livingston and/or Park County):
  - In one word, what would be your vision for the future of Downtown Livingston?

Preserved Trees History Vibrancy Character Pedestrian Accessibility Fun  
Parking small town historic Planned Preservation Thriving  
maintain Sustainable **Community** inclusive  
Vibrant art galleries shops Unchanged Local affordable  
business walkable Keep Connecting growth Leave alone Charm  
Better parking

## BUSINESS OWNER BREAKFAST 11.15

### VISION:

- ◆ INCREASE WAYS TO GET AROUND
- ◆ HOW TO "CAPTURE" VISITATION & PULL VISITORS FROM HWY. INTO DOWNTOWN
- ◆ MAKE KNOWN EASE OF ACCESS FROM HWY. → CO-MARKET BUSINESSES
- ◆ EMPHASIZE CO-BENEFITS TO BUSINESS USES ◆ GET WORD OUT ON COLLABORATIONS & EVENTS
- ◆ NEED FOR BASIC SERVICES → "UNDERWEAR & SOCKS!" ◆ UNDERSTAND OTHER BUSINESS OPPORTUNITIES
- ◆ CONNECT UNDER-DEVELOPED, INDUSTRIAL AREAS ◆ CLEAN & SAFE & ACCESSIBLE

## STRENGTHS

- + WE ARE A DESTINATION → LOVING PLACE TO DEATH
- + RIVER & ACTIVITIES
- + WORLD-CLASS MUSEUM & ASSETS
- + ICONIC SMALL, MONTANA TOWN
- + LOCALLY OWNED, QUIRKY BUSINESSES → NO NATIONAL CHAINS
- + ARTS PRESENCE - OF ALL KINDS!
- + STRONG BID.
- + LACK OF INFILL → TRANSITION TO N'HOOD
- + UNPRETENTIOUS (BUT PROUD)
- + NATIONAL PARK CONNECTION & HISTORY

## WEAKNESSES

- OFFICES USING STOREFRONT SPACES
- COULD USE ANCHOR STORES → ESP. S. OF LEWIS
- RELUCTANCE TO WALK A FEW BLOCKS TO VISIT BUSINESSES
- PARKING NEEDS CAUSE STRAIN ON N'HOODS → UTILIZE SOME PRIVATE SPACES w/ CREATIVE SOLUTIONS? → PRIORITIZE ACCESSIBLE NEED → DEDICATED BUSINESS OWNER PARKING
- LACK OF PUBLIC RESTROOMS
- LACK OF EFFICIENT STRIPING/MARKING FOR PARALLEL PARKING
- 2-HR LIMIT IS CHALLENGING FOR LONG-TERM USE BUSINESS USE NEEDS → ie. SPAS
- WEEKEND STRAIN ON PARKING CAPACITY → NEED FOR RESIDENT PARKING & NEW DEVELOPMENT

- RESTAURANT CLOSURES/STAGGERED SCHEDULES → WORKFORCE SHORTAGE
- CHALLENGE TO COMMUTE N/VISIT IN WINTER → PASSENGER RAIL/BUS SERVICES TO/FROM BOZEMAN, ETC.

## OPPORTUNITIES

- + HELP LOCAL BUSINESSES PROBLEM-SOLVE → LINK HOUSING TO EMPLOYMENT
- + SHARED BUSINESSES HOUSING → MODULAR?
- + INCREASED PARKING CAPACITY w/ DIFFERENT CONFIGURATIONS
- + SHUTTLE TO/FROM PARK & AROUND DOWNTOWN CORE
- + MIXED-USE SPACES → SEASONAL USE CHANGE → MORNING/EVENING POP-UP
- + FOOD TRUCK/POP-UP TO SUPPLEMENT DEMAND → LUNCH (STRAIN LABOR)

- + TELL "UNTOLD" STORIES OF DOWNTOWN!
- + "WORK TO SCHOOL" PROGRAMS
- + HOUSING ALONG RAILROAD OWNED PROPERTIES

## THREATS

- WORKFORCE SHORTAGE DIRE → LACK OF SKILLED LABOR
- LACK OF HOUSING AVAILABILITY → AFFORDABILITY & HIGH RENTAL RATES
- CYCLE OF LACK OF HOUSING INCREASING LABOR COST & OPERATIONS COST
- REMOTE WORKFORCE FURTHER STRAINING HOUSING SHORTAGE → LNE IN PARADISE & WORK REMOTE
- LACK OF HIGH SCHOOLERS IN WORKFORCE
- PARKING STRAIN BY STRS
- BOZEMAN'S LACK OF AFFORDABILITY
- LACK OF PUBLIC TRANSIT PRECLUDING WORKFORCE OPPORTUNITY
- STR TAKING AFFORDABLE HOUSING CAPACITY

## ONE CHANGE:

- 2ND-STORY DEVELOPMENT
- REVITALIZE/INFILL
- RETAIL 1ST FLOORS
- BUSINESSES LIT AT NIGHT
- MORE BUSINESS COLLAB.
- CLEANER STREETS & ALLEYS
- CIGARETTE BUTT STATIONS
- LANDSCAPING
- MIXED-USE HOTEL

Notes from a SWOT (Strengths, Weaknesses, Opportunities, Threats) Analysis conducted at the Business Owner Breakfast

## COMMUNITY WORKSHOP & OPEN HOUSE EXERCISES - SUMMARIZED INPUTS

NOVEMBER 14TH - 16TH, 2023

*Livingston*  
DOWNTOWN MASTER PLAN

### LAND USE & ACTIVATION EXERCISE

At the Community Workshop / Charrette, and at the Community Open House, participants were asked to collaborate with other groups of attendees to express their map-based ideas within the Downtown Master Plan Study Area.

For this exercise, participants focused on the land uses and activation opportunities they would like to see in the future within the Downtown, and placed color-coded dots on areas to indicate those preferences. In addition, participants were encouraged to add notes to the map with markers and post-it notes to further elaborate on their specific preferences.

A consolidated set of the inputs received is shown on top of the map to the right. Consistent themes expressed across all of the participant groups included:

- Pocket Park / Plaza interest to activate the parking lots along Main Street
- Expansion of some shops restaurants south toward the river
- Interest in Residential Infill

### KEY TO SUMMARIZED RESULTS SHOWN ON MAP

- Pocket Park / Plaza Space
- Residential
- Shops / Restaurants
- Hotel

\*\* Notes/additional markups added to map are shown as post-it notes \*\*

### Downtown Master Plan - Underutilized Parcels / Opportunity Sites Exercise

- |                                                                                      |                                    |                      |                                                      |
|--------------------------------------------------------------------------------------|------------------------------------|----------------------|------------------------------------------------------|
| City of Livingston Boundary                                                          | 2+ Story Buildings                 | County Owned Parcels | Low Floor Area Ratio Parcels (< 0.25)                |
| Plan Area Boundary (Also Urban Renewal Authority [URA] Boundary, except where noted) | City/School District Owned Parcels | Vacant Parcels       | Parcels with Land Value 2Xs (or more) Building Value |

DOWNTOWN MASTER PLAN

### CIRCULATION & MOBILITY EXERCISE

At the Community Workshop / Charrette, and at the Community Open House, participants were asked to collaborate with other groups of attendees to express their map-based ideas within the Downtown Master Plan Study Area.

For this exercise, participants focused on the circulation and mobility opportunities they would like to see in the future within the Downtown, and placed color-coded dots on areas to indicate those preferences. In addition, participants were encouraged to add notes to the map with markers and post-it notes to further elaborate on their specific preferences.

A consolidated set of the inputs received is shown on top of the map to the right. Consistent themes expressed across all of the participant groups included:

- Gateway desires along Park St., from I-90, at Geyser & Park St. and to/from Sacajawea Park
- Stronger Connections to Sacajawea Park
- Stronger Access to the North side of town

#### KEY TO SUMMARIZED RESULTS SHOWN ON MAP

- Gateway Opportunity
- Local Destination
- Tourist Destination
- Need for better access
- Desire for better/safer connection

\*\* Notes/additional markups added to map are shown as post-it notes \*\*

NOVEMBER 14TH - 16TH, 2023

*Livingston*  
DOWNTOWN MASTER PLAN

### PARKING MANAGEMENT EXERCISE

At the Community Workshop / Charrette, and at the Community Open House, participants were asked to collaborate with other groups of attendees to express their map-based ideas within the Downtown Master Plan Study Area.

For this exercise, participants focused on how they would like to see parking managed in the future within the Downtown, indicated places where they experience difficulty finding parking today. They placed color-coded dots on areas to indicate those preferences. In addition, participants were encouraged to add notes to the map with markers and post-it notes to further elaborate on their specific preferences.

A consolidated set of the inputs received is shown on top of the map to the right. Consistent themes expressed across all of the participant groups included:

- Lack of available parking on Main St.; Desire for higher turnover spaces there
- Longer-term parking desire at The Depot & in Parking Lots

### KEY TO SUMMARIZED RESULTS SHOWN ON MAP

- Potential high-turnover area (~30 minutes)
- Potential long-stay area (3+ hours)
- Additional 2-hour limits needed
- Areas you have trouble finding parking regularly

\*\* Notes/additional markings added to map are shown as post-it notes \*\*

### ARTS/AMENITIES/ EVENTS EXERCISE

At the Community Workshop / Charrette, and at the Community Open House, participants were asked to collaborate with other groups of attendees to express their map-based ideas within the Downtown Master Plan Study Area.

For this exercise, participants focused on the arts, amenities and events opportunities they would like to see in the future within the Downtown, and placed color-coded dots on areas to indicate those preferences. In addition, participants were encouraged to add notes to the map with markers and post-it notes to further elaborate on their specific preferences.

A consolidated set of the inputs received is shown on top of the map to the right. Consistent themes expressed across all of the participant groups included:

- Desire for Public Art as Gateway Opportunities along Park Street - 7th & Park; at Main & Park and Leading to the Yellowstone River
- Opportunities for temporary closures/events
- Promotion of The Depot & Gateway Museum

### KEY TO SUMMARIZED RESULTS SHOWN ON MAP

- Public Art Opportunity
- Opportunity for temporary closures / gatherings
- Asset / Amenity in need of promotion / enhancement

\*\* Notes/additional markups added to map are shown as post-it notes \*\*

# 1. Introduction and Summary of Findings

As part of the process to create a new Downtown Master Plan for the City of Livingston led by Crescendo Planning + Design, Economic & Planning Systems, Inc. (EPS) was tasked with providing the City of Livingston with a greater understanding of housing conditions and opportunities in the Downtown Livingston Study Area.

This report documents existing conditions in Downtown Livingston including the area's housing supply, estimates demand for future housing, and assesses the feasibility of housing prototypes in the Study Area and associated financial gaps.

## Key Findings

### Housing Study

- 1. The cost and composition of the housing stock in Livingston has started to shift, which has impacts on both renters and prospective homeowners.***

Nearly half of renter households in Livingston are cost burdened, meaning they spend more than 30 percent of their income on rent. Of these households, roughly 18 percent are severely cost burdened, meaning they spend more than 50 percent of income on rent. Additionally, many households in Livingston are unable to purchase a home at the current median sales price, based on their annual income. To afford a single-family home in Livingston at the estimated 2023 median listing price of \$682,000, a household would need to earn over \$160,000 annually (229% of the 2023 Park County AMI for a 2-person household).

- 2. Over 80 percent of the job growth in Park County in the past five years (from 2018-2023) is attributed to industries with average wages that translate to household incomes below 120 % of AMI.***

Wages paid for many of the jobs being created in the county predominately equates to a household income of \$90,000 to \$120,000 per year depending on household size. Livingston HealthCare is the city's largest employer, which contributes to Health Care being the largest employment industry, followed by Retail Trade, Accommodation/Food Services, Public Administration, and Education. The growth of these industries will continue to generate demand for housing options affordable to those earning at or below the area median income.

**3. *The City of Livingston overall needs to continue to attract diverse housing products to keep pace with employment-driven demand.***

Livingston is estimated to need 85 new housing units per year over the next 10 years to keep pace with workforce demands. A large share of this demand will be for attached and multifamily housing.

During the past decade, the small inventory of rental apartments units in the city has not kept pace with demand and the number of rental units in the Downtown area has even declined. However, new multifamily for-sale housing has been constructed in recent years, and new condo units in Livingston (outside of the Study Area) have sold for less than \$400,000, which can serve as an attainable for-sale housing option.

### **Feasibility Analysis**

**4. *The City can benefit from increased housing options in Downtown that are affordable to the existing workforce; however, there are development feasibility challenges for all three of the potential housing products identified for Downtown.***

The goal of attracting any significant new housing Downtown, especially housing that is affordable to the City's workforce, will likely require regulatory and/or financial support. Housing options 2 and 3 are the types of projects that would provide attainable options for the workforce, but there are feasibility gaps that need to be addressed through use of regulatory and financial tools. Proactive efforts by the City, URA, and other partners can lead to the development of these types of projects.

**5. *It is unlikely that medium-to-large scale, vertical, mixed-use housing projects (greater than 20 units) will be feasible for development Downtown in the near future due to financing gaps.***

The construction of condos and/or luxury rental units would need to be accommodated through smaller projects that would likely involve the adaptive reuse of existing buildings Downtown.

## 2. Economic and Demographic Profile

This chapter summarizes economic and demographic trends in the Downtown Livingston Study Area, the City of Livingston, and Park County. This section includes trends on population, households, age, and income, followed by an analysis of employment trends in Livingston and Park County.

### Study Area

The Downtown Study Area is shown below in **Figure 1**. The Study Area contains Downtown Livingston and the Urban Renewal Authority (URA) boundary. Trends within this Study Area are compared to trends within the city and county at large.

**Figure 1. Study Area**

## Demographics

The Study Area has grown at a slightly faster rate than Livingston and Park County overall since 2010. The Downtown Study Area grew in population by 285 residents from 2010 to 2023, shown in **Table 1**. This equates to 13.8 percent of the total population growth in Park County during this period. Between 2010 and 2023, the Study Area grew by 126 households, a 19 percent increase from 650 households in 2010.

**Table 1. Population and Household Trends, 2010-2023**

| Description | 2010   | 2023   | 2010-2023 |          |        |           |

Source: ESRI Business Analyst; Economic & Planning Systems

The Study Area's residents have a median age of 48.3 which is slightly higher than Livingston (with a median age of 45.7), but similar to Park County's median age (48.8).

The median household income in the Study Area of \$44,892 is notably lower than the city and county, however this is somewhat due to the smaller household sizes. The Study Area's average household size (1.70) is smaller than the city and county (2.08 and 2.12 respectively), as shown in **Table 2**.

**Table 2. Demographic Comparison, 2023**

|                         | 2023       |            |             |
|-------------------------|------------|------------|-------------|
|                         | Study Area | Livingston | Park County |
| Population              | 1,362      | 8,900      | 17,704      |
| Median Age              | 48.3       | 45.7       | 48.8        |
| Median Household Income | \$44,892   | \$55,398   | \$62,610    |
| Average Household Size  | 1.70       | 2.08       | 2.12        |

Source: ESRI Business Analyst; Economic & Planning Systems

The Downtown Study Area has seen its population trend older since 2010. The Study Area's median age has increased by 5.6 years since 2010, from 42.7 to 48.3. When looking at the Study Area's share of population by age, every cohort under the age of 59 has decreased in share of population between 2010 and 2023. Conversely, the share of residents over the age of 60 has increased by a total of 10.4 percentage points, seen in **Figure 2**. This may indicate that Downtown Livingston is attracting more retirees.

**Figure 2. Study Area Population by Age, 2010 and 2023**

Source: ESRI Business Analyst; Economic & Planning Systems

The trend towards older residents in the Downtown Study Area aligns with citywide trends. The median age in Livingston increased by 3.8 years since 2010, from 41.9 to 45.7, reflecting the city's aging population.

As shown in **Figure 3**, a smaller proportion of residents under the age of 19 live within the Study Area compared to Livingston at large, approximately 16 percent compared to 20 percent. With that said, there is a larger share of residents in the 25 to 44 age range within the Study Area, indicating that Downtown Livingston is drawing a higher share of working-aged adults than the city at large.

**Figure 3. Study Area and Livingston Population by Age, 2023**

Source: ESRI Business Analyst; Economic &amp; Planning Systems

The Study Area has a much higher share of 1-person households than the city and county at large, as shown in **Table 3**.

**Table 3. Household Type, 2010-2023**

| Description                     | Study Area |       | Livingston |       | Park County |       |

[1] Households with children reflects 2022 figures and 1-person households reflects 2020 figures for 2023.

As shown in **Table 4**, from 2010 to 2023, the share of owner-occupied housing units increased in the Study Area, Livingston, and Park County overall. The Study Area gained approximately 134 owner-occupied housing units while renter-occupied units remained stagnant during this period.

## Employment

### Livingston Employment

Livingston's total employment across all industries in 2022 was 4,123. This figure has grown by 422 since 2010, which translates to approximately 35 new jobs annually as shown in **Table 5**.

**Table 5. Employment by Industry – Livingston, 2010-2022**

| Description                 | 2010  | 2022  | 2010-2022 |        |        |

| Total Jobs - All Industries | 3,701 | 4,123 | 422       | 35     | 0.9%   |

Source: JobsEQ; Economic & Planning Systems

Livingston's largest industries as of 2022 are Health Care with 775 jobs, followed by Retail Trade with 626 jobs, Accommodation/Food Services with 581 jobs, Public Administration with 300 jobs, and Education with 297 jobs. Together, these top five industries make up over 60 percent of Livingston's total employment base (**Figure 4**). The presence of Livingston HealthCare is the main reason that Health Care is the top industry citywide.

**Figure 4. Largest Industries by Employment – Livingston, 2022**

Between 2010 and 2022, Retail Trade was the fastest growing industry in Livingston, increasing by 177 jobs with an annual average income per worker of \$34,803. This annual wage translates to less than 60% of Park County's 2023 AMI for a 1-person household. Since HUD defines renters below 80% of AMI as low income, a single-person household earning this wage would fall under this threshold.

Overall, recent employment growth in Livingston has been primarily in lower wage industries. Other growing industries beyond Retail Trade include Administrative and Waste Services, which increased by 123 jobs, Health Care (adding 116 jobs), Education (adding 103 jobs), and Education (adding 92 jobs). Employment in some of the highest paying industries, such as Mining, Management, and Utilities has remained stagnant since 2010. The Manufacturing industry saw the largest decrease in employment, as shown in **Figure 5**.

**Figure 5. Job Growth by Industry and Wages – Livingston, 2010-2022**

Source: JobsEQ; Economic & Planning Systems

## Park County Employment

Park County has seen a higher rate of employment growth than Livingston since 2010. As of 2022, Park County has approximately 8,000 jobs across all industries. This is 1,663 more jobs than in 2010 (equating to approximately 139 new jobs annually), as seen in **Table 6**.

**Table 6. Employment by Industry – Park County, 2010-2022**

| Description                    | 2010  | 2022  | 2010-2022 |        |        |

Source: JobsEQ; Economic & Planning Systems

Park County's largest industries by employment are Accommodation/Food Services with 1,631 jobs, Retail Trade with 875 jobs, Health Care with 828 jobs, and Construction with 756 jobs as of 2022. These top four industries make up approximately half of the total employment in Park County (**Figure 6**).

**Figure 6. Largest Industries by Employment – Park County, 2022**

Source: JobsEQ; Economic &amp; Planning Systems

Between 2010 and 2022, the Accommodation/Food Services industry saw the highest amount of employment growth in Park County, adding just over 400 jobs (**Figure 7**). In 2022, the annual average wage of this industry was \$30,420, which is lower than almost every other industry (primarily due to the prevalence of tips in this industry, which is not accounted for in this data). Growth in the Accommodation/Food Services industry made up nearly a quarter of the total employment growth in Park County since 2010.

**Figure 7. Job Growth by Industry and Wages – Park County, 2010-2022**

Source: JobsEQ; Economic &amp; Planning Systems

Other industries that have seen employment growth include Construction (adding 239 jobs), Administrative and Waste Services (adding 213 jobs), Retail Trade (adding 167 jobs), and Manufacturing (adding 168 jobs). Since 2010, the County lost 59 jobs in Education and 27 jobs in Information (**Table 6**).

As shown in **Figure 8**, roughly half of Livingston's Retail Trade and Accommodation/Food Services businesses are located Downtown within the Study Area. Many of Livingston's businesses belonging to Professional Services industries are located Downtown. This includes 80 percent of Education, 77 percent of Information, and 72 percent of Public Administration businesses.

### 3. Real Estate Market Conditions

This chapter provides a summary of housing and commercial real estate trends in the Study Area, Livingston, and Park County. This chapter summarizes overall housing conditions, multifamily trends, and market factors related to the commercial market with a focus on retail and hospitality.

#### Housing Trends

Approximately 845 out of 4,545 housing units in Livingston are in the Downtown Study Area, which equates to 19 percent, as shown in **Table 7**.

In 2023, around 8.2 percent of housing units in the Study Area and 7.7 percent in Livingston were vacant. In comparison, Park County's residential vacancy rate was roughly two times higher than both the Study Area and city at 16 percent. These vacant units include homes used for seasonal, recreational, or occasional use.

**Table 7. Housing Inventory, 2010-2023**

Source: ESRI Business Analyst; Economic & Planning Systems

Note: % Total reflects the percentage of occupied housing units that are owner and renter occupied, and the percentage of total housing units that are vacant.

## Second Homes

The U.S. Census categorizes housing units used for seasonal, recreational or occasional use as vacant. As shown in **Figure 9**, approximately 56 percent of vacant housing units are used seasonally. As a result, nearly one out of 10 housing units in the county are second homes or used for seasonal use.

**Figure 9. Vacant Housing Units by Type – Park County, 2022**

Source: U.S. Census; Economic & Planning Systems

## Multifamily Trends

As of 2023, there are approximately nine apartment buildings containing 135 multifamily rental units within the Study Area. This equates to roughly half of the total apartment units within Park County (274) as seen in **Figure 10**.

**Figure 10. Multifamily Inventory, 2023**

Source: CoStar; Economic & Planning Systems

As shown in **Figure 11**, multifamily vacancy rates in Livingston dropped by approximately 5 percent from 2015 to 2023, and rents increased by 11 percent.

**Figure 11. Apartment Market Trends, 2015-2023**

| Description      | 2015    | 2023    | 2015-2023 |          |

| Vacancy Rate     | 15.8%   | 8.0%    | -7.8%     |          |

Source: CoStar; Economic & Planning Systems

Multifamily buildings in both the Study Area and Livingston have seen decreasing vacancy rates and increasing rental rates in recent years (**Figure 12**). It is worth noting that these figures are based on a low number of multifamily properties, as there are only nine properties in the Study Area. Rental and vacancy rates in Park County have historically aligned with Livingston numbers, which may be due to data limitations caused by the region's low multifamily supply.

**Figure 12. Multifamily Rent and Vacancy – Study Area & Livingston, 2015-2023**

Source: CoStar; Economic & Planning Systems

## For-Sale Housing

In the fourth quarter of 2023, the median list price for residential for-sale housing in Livingston was approximately \$637,000, as shown in **Figure 13**. This is a 46.3 percent increase since the fourth quarter of 2016.

**Figure 13. Median List Price – Livingston Zip Code (59047)**

As of 2023, the average list price for all for sale housing product in Livingston was around \$1 million, an increase of approximately \$400,000 since 2016 (**Figure 14**).

**Figure 14. Average List Price – Livingston Zip Code (59047)**

## New Multifamily Projects

New multifamily housing, shown below, has recently been constructed in Livingston outside of the Downtown Study Area.

**Yellowstone Granary**  
924 E Park St

This adaptive reuse project repurposes an historic grain elevator into 18 apartment units. Built in 2023, Yellowstone Granary features studio to 2-bedroom units located in unique areas of the granary: the grain elevator, mill, and ranch store. As of 2024, 2-bedroom units rent for approximately \$2,000 per month and the 1-bedroom units rent for around \$1,605.

**The Flats at Yellowstone Bend**  
2222 Willow Drive

The Flats at Yellowstone Bend includes a total of 140 2- and 3-bedroom condominium units. Completed in 2023, new units sold for around \$350,000. This multifamily project is located across the street from Yellowstone River Inn & Suites and is situated at the intersection of U.S. Highway 191 and Highway 89.

## Commercial Inventory

As seen in , nearly all office space in the City of Livingston and Park County is in the Downtown Study Area. Approximately 38 percent of Livingston's retail square footage is within the Study Area and 84 percent of Park County's retail inventory is within Livingston.

**Figure 15. Commercial Inventory, 2023**

Source: CoStar; Economic & Planning Systems

## Commercial Rent and Vacancy Rates

### Retail

As shown in **Figure 16**, in 2023 Livingston's retail vacancy rate was very low at nearly 0 percent, which is consistent with low vacancy rates historically and may be due to data availability issues common in smaller cities and towns.

The city's average retail rent in 2023 is \$16 per square foot, a significant increase from 2019's average rental rate of \$11.38 per square foot (the previous year in which rental data for the city is available).

**Figure 16. Retail Rent and Vacancy – Livingston, 2015-2024 YTD**

Source: CoStar; Economi& Planning Systems  
 Note: Rent and vacancy data unavailable from 2020-2022.

### Office

Livingston has a limited inventory of commercial office buildings. Most office properties in the city are in buildings smaller than 8,000 square feet and the city's largest office space is a medical office building at 422 S Main Street totaling just under 25,000 square feet. Therefore, due to the lack of large commercial office space in the city, rent and vacancy rates are not readily available.

## Hospitality

### Visitation Trends

As many markets across the country saw their hospitality and tourism industries struggle to recover from the impacts of the COVID-19 pandemic, Livingston's Convention and Visitors Bureau (CVB) saw tourism increase in 2021 and 2022 as tourism shifted towards more rural areas with nearby outdoor recreation opportunities. The addition of new hotel rooms in Livingston in 2021 helped to increase the tax generated by tourists. In 2021, the Livingston CVB collected 92 percent more lodging tax revenue than prior to the pandemic in 2019, as shown in **Figure 17**. This revenue dropped slightly in 2022, but at \$500,000 was still notably higher than pre-pandemic figures.

**Figure 17. Lodging Tax – Livingston CVB, 2015-2022**

### Hotel Inventory

Although the Murray Hotel, with 30 rooms, is the only official hotel in the Downtown Study Area as of 2023, boutique hotels that operate on short-term rental platforms, such as the Grabow Hotel, also exist.

As shown below in **Table 8**, 11 hotels are in Livingston (approximately one-third of Park County hotels) that accommodate a total of 489 rooms. A Home2 Suites by Hilton is currently under construction, which will add an additional 90 rooms.

**Table 8. Hotel Inventory, 2023**

| Hotel Inventory | Buildings | Rooms |
|-----------------|-----------|-------|
| Study Area      | 1         | 30    |
| Livingston      | 11        | 489   |
| Park County     | 30        | 1,323 |

Source: CoStar; Economic & Planning Systems

### Hotel ADR and Occupancy

After declining during the COVID-19 pandemic, which had large impacts on the hospitality sector, the average daily rate (ADR) of Livingston's hotels have recovered and were at their highest in 2023 at approximately \$167 by the end of the year. Trailing 12-month average occupancy rates peaked in late 2021 into 2022, but as of summer 2023, Livingston's hotel occupancy rate was about 80 percent, which was higher than the previous summer. These occupancy rates indicated increased demand for new hotel rooms in the city.

**Figure 18. 12 Month ADR and Occupancy – Livingston, 2010-2023**

### Short-Term Rentals

As of early 2024, the City of Livingston's 229 active short term rental listings generated an average annual revenue of \$67,400 over the past 12 months, according to AirDNA. This average is increased by rental properties on large plots of land in scenic areas surrounding the core of Livingston. Within Downtown Livingston, average annual revenues are lower, typically ranging from approximately \$10,000 to \$30,000 annually.

Short-term rentals in the Livingston market have a 12-month average monthly occupancy rate of 57 percent and an average daily rate (ADR) of \$320.50 per night. Short-term rentals in Downtown Livingston vary in price, but in general a rental for 2 to 4 people costs between \$150 and \$400 per night in the summer and larger rentals can command a rate of \$700 per night and up. In the winter months, nightly rates can drop as low as \$100 per night. Only 1.6 percent of short-term rental listings have a minimum stay of 30+ nights and 90.0 percent of listings have a minimum stay of three nights or less. This indicates that there is not currently a high demand for medium-term rentals in Livingston.

## 4. Housing Demand Study

### Existing Housing Gaps

#### Income Level Definitions

The graphic shown below illustrates how various income levels are linked with different types of housing and housing programs. The boundaries of each income range are not always fixed as shown below, as there needs to be consideration of the local context and market conditions. There is an important distinction between 60 to 80% of AMI since federal and state funding for housing development generally ends above 60% of AMI, with some more limited programs that extend to 80% of AMI (e.g., income averaging in LIHTC projects).

Income-restricted and other deed-restricted homeownership programs are typically in the 80 to 120% AMI range. With that said, programs and policies can extend above these ranges in high-cost housing markets.

Figure 19. Housing Program Income Levels

## Cost Burden

Households that pay more than 30 percent of their income towards housing payments (rent or mortgage) are defined as housing cost burdened, and households that pay more than 50 percent of their income are severely cost burdened.

As shown in **Figure 20**, nearly half of renter households (49.5 percent) in Livingston are cost burdened or severely cost burdened. In comparison, approximately 28.8 percent of households who own their homes are cost burdened. Since homeowners typically have more stable housing and housing costs, a higher share of renter households are typically more likely to be cost burdened.

**Figure 20. Housing Cost Burden by Household Type – Livingston, 2022**

Source: U.S. Census ACS 5-Year Estimates, Economic & Planning Systems

Countywide, less than half of renter households (43.7 percent) are cost burdened, and a quarter of homeowners (24.9 percent) are cost burdened (**Figure 21**). Although there is a lower share of cost burdened households in Park County compared to Livingston, there is a slightly higher share of extremely cost burdened households countywide spending over 50 percent of income on housing costs.

**Figure 21. Housing Cost Burden by Household Type – Park County, 2022**

Source: U.S. Census ACS 5-Year Estimates, Economic & Planning Systems

### Ownership Income Gap

As shown in **Figure 22**, a household income of approximately \$160,000 is required to afford a single-family home in Livingston at the median sale price (as of Q2 2023). Based on Park County's 2023 AMI for a 2-person household, households with an income equivalent to the AMI (\$70,000) would need to earn an additional \$90,000 per year to afford a house at the median price. A household earning 150% of the AMI would still require an additional \$55,000 annually to afford a home at this price point.

**Figure 22. Income Gap to Afford Median Priced Single-Family Home – Livingston, 2023**

Source: HUD; Realtor.com; Economic & Planning Systems

As shown in **Table 9**, approximately 60 percent of households who own their home have a household income below the 150% of AMI threshold. As of 2022, nearly 40 percent of households had a household income above 150% of Park County's 2023 AMI.

**Table 9. Owner Households by AMI – Park County, 2022**

| Description             | 2022         |         |
|-------------------------|--------------|---------|

Source: U.S. Census; Economic & Planning Systems

## Rental Income Gap

Though long-term rents in Livingston vary and there are data gaps on rent rates in smaller communities, the median rent in Livingston is approximately \$1,900. To afford this monthly rent, a household needs to earn \$72,000 in annual income.

**Figure 23** shows that based on Park County's 2023 AMI, a 2-person household earning 80% of the AMI would need to earn an additional \$16,000 per year to afford a monthly rental at this price. Additionally, a household earning 100% of the AMI would require an extra \$2,000 annually to afford this monthly rent without being rent burdened.

Unlike the homeownership income gap shown in **Figure 22**, a renter living alone earning approximately 102% of the AMI and above would be able to afford a rental unit priced at the median rate.

**Figure 23. Income Gap to Afford Median Rent – Livingston, 2023**

Around 65 percent of renters have a household income below the AMI for a 2-person household in Park County as of 2022 (**Table 10**). This indicates that nearly two-thirds of households are unable to afford above \$2,000 a month in rent.

**Table 10. Renter Households by AMI – Park County, 2022**

| Description              | 2022         |         |

## Future Demand

In this section, a housing demand projection is provided to show growth potential and future housing needs in Livingston and Park County.

### Commuting Workers

In 2021, 57.1 percent of jobs in Livingston were filled by in-commuters, which is an increase from 52.8 percent in 2010. This reduction in resident-filled jobs indicates that Livingston's workforce may be moving to nearby areas with lower housing costs (**Table 11**) or businesses are needing to attract workers from further away to fill positions.

**Table 11. Livingston Commuting Patterns, 2010-2021**

| Commuting Patterns     | 2010  | 2021  |
|------------------------|-------|-------|
| <b>Livingston Jobs</b> |       |       |
| Filled by Residents    | 47.2% | 42.9% |
| In-Commuters           | 52.8% | 57.1% |

Source: U.S. Census LEHD; Economic & Planning Systems

As shown in **Table 12** and **Figure 24**, the majority of Livingston workers who are in-commuters live in other areas of Park County, as well as nearby Gallatin County. Approximately 17.5 percent of Livingston workers live in areas outside of these zip codes.

**Table 12. Where Livingston Workers Live, 2021**

| Home Origin         | In-Commuters |               |
|---------------------|--------------|---------------|
|                     | Workers      | % Total       |

### Employment Driven Demand

A housing demand projection is provided in **Table 13** that links job growth to housing demand. This projection estimates that Park County needs roughly 130 housing units annually to keep up with job growth at 2.0 percent per year (for reference, the average annual rate of growth since 2010 has been 0.9 percent in the City of Livingston).

This projection accounts for strong market demand drivers such as Livingston becoming more of a destination for second homeowners, part-time residents, and remote workers. Based on these housing demand projections, Livingston can support approximately 85 new housing units per year.

**Table 13. Livingston Housing Demand Projection**

| Description                          | Factor              | 2022         | 2032         | 2022-2032    |            |
|--------------------------------------|---------------------|--------------|--------------|--------------|------------|
|                                      |                     |              |              | Total        | Annual     |

### Employment-Based Affordability

**Table 14** below shows the alignment between job growth, wages, and Park County AMI levels. Based on the assumption that a household brings in 1.5 incomes, average wages for jobs in the Agriculture/Forestry/Fishing, Arts/Entertainment/Recreation, Accommodation/Food Services, and Retail Trade industries equate to a household income below 80% of the AMI for a 2-person household. Beyond these industries, the average annual wage increases with the Mining industry at the top, which has an average annual wage of \$96,000. For a 2-person household, this income equates to 206% of the AMI.

Over 80 percent of the job growth in Park County from 2018 to 2023 has been in industries that translate into household incomes below 120% of AMI. To support employment growth in the county, there needs to be an increase in the number of rental units and for-sale housing options that are priced lower than the current average for the county.

**Table 14. Employment Based Affordability**

| Industry                           | Avg. Wage<br>2023 | Household<br>Income [1.5]<br>2023 | 2-Person<br>HH AMI<br>2023 | 60-80% AMI     |

## 5. Feasibility Analysis

The feasibility of housing development in Downtown Livingston was analyzed to support the Downtown Master Plan. Potential housing types that are likely in demand in Livingston were identified and aligned with potential development sites to test feasibility on potential, real-world projects.

To assess feasibility, EPS developed a static pro forma feasibility model to illustrate cost and revenue factors associated with the most supportable housing product types in the Downtown Livingston Study Area.

### Project Prototypes

Based on the housing study and outreach to the development/real estate community in Livingston, three housing prototypes were identified that are likely supportable in Downtown. The three housing prototypes analyzed are summarized in **Table 16**.

**Table 16. Project Prototypes**

| Option      | Option 1                                          | Option 2                                  | Option 3                             |
|-------------|---------------------------------------------------|-------------------------------------------|--------------------------------------|
| Description | 4-Story Mixed-Use Condo (Behind the Murray Hotel) | 3-Story Walk-Up Apartment (NW Energy Lot) | 3-Story Townhomes (Front Street Lot) |
| Zoning      | Mixed-Use                                         | Mixed-Use                                 | Mixed-Use                            |
| Stories     | 4-Story                                           | 3-Story                                   | 3-Story                              |
| Parking     | Parking Garage                                    | Tuck Under / Surface                      | Tuck Under / Surface                 |

## **Option 1: Mixed-Use Condo Building Behind the Historic Murray Hotel**

As shown in **Table 17**, the option 1 prototype is a 4-story, mixed-use condominium building. This prototype consists of 24 residential units including 4 penthouses, 3,000 square feet of ground floor retail space, and a parking garage with 30 spaces (a ratio of 1.25 spaces per unit).

The average unit size is 2,200 square feet for penthouse units and 880 square feet for the other residential units. The net leasable building area is 26,400 square feet, and the gross building area is 29,520 square feet.

### **Sales Price and Costs**

Assumption on sales prices and projects costs for Option 1 are shown in **Table 17**. This prototype assumes that penthouse units have a sales price of \$700 per square foot and condo units have a sales price of \$400 per square foot.

Vertical construction costs are set at \$350 per square foot for multifamily uses and \$300 per square foot for retail space based on information from local stakeholders and similar projects. Costs for parking garage construction are set at \$25,000 per parking space. Land acquisition costs are \$100 per square foot due to the site's desirable location in the Downtown core. Site work costs are set at \$10 per square foot of land.

Source: Economic &amp; Planning Systems

Soft costs, which include design, architecture, developer fees, permits, etc., are estimated to be around \$2.38 million (**Table 18**). The total cost for this project is estimated to be \$15.85 million, which equates to \$487 per square foot (of the building gross area) and \$660,497 per unit.

Per unit and in total, this option has the highest construction costs partially due to this site's higher land value.

## Feasibility Gaps

Assessing the financial feasibility of a project involves estimating metrics of return. Return on cost shows the net annual income that a project generates in a particular year relative to its total cost to build. The return a project generates is compared to a hurdle rate, or the rate of return that a project would need to generate in order to be financially feasible. If the rate of return of the project is lower than the hurdle rate, then the project has a financial feasibility gap.

Option 1's project return on cost is estimated to be -5.4 percent, as shown in **Table 20**. With a 12 percent hurdle rate, this development has an overall feasibility gap of \$2.75 million, which is 17 percent of total project costs. This financial feasibility gap means that this prototype has major barriers to feasibility. Major drivers of feasibility that would need to change for the project to be feasible include the achievable sale prices, construction cost, and cost of land. The smaller condo units in the project are priced around \$500,000, which may be affordable to a sizable portion of the Livingston workforce. Higher prices would mean that units would need to sell to luxury buyers and likely be oriented towards retirees or second homeowners, similar to the penthouse units.

It will be challenging to find a large enough buyer pool of retirees/second homeowners to support this size of project. While the prototype attempts to be oriented towards both types of buyers, the luxury condo market will likely need to be supported through smaller projects or adaptive reuse projects of older buildings.

**Table 20. Option 1 Project Return on Cost and Gap**

| PROJECT RETURN AND GAP |              |
|------------------------|--------------|
| PROJECT COST           |              |
| Total Cost             | \$15,851,924 |
| Per GBA                | \$487        |
| Per Unit               | \$660,497    |
| STATIC EVALUATION      |              |
| Return on Cost         |              |
| Total Project Value    | \$15,000,289 |
| Total Project Cost     | \$15,851,924 |
| Project Return         | -\$851,635   |
| Return on Cost         | -5.4%        |
| Target                 | 12.0%        |
| Target Return          | \$1,902,231  |
| Gap                    | \$2,753,866  |
| Gap per Unit           | \$114,744    |

## Option 2: Apartment Building at the Northwest Energy Site

The second housing prototype is a 3-story apartment building containing 42 rental units with an average unit size of 755 square feet. Parking includes 30 surface parking spaces and 22 tuck under spaces (a ratio of 1.24 spaces per unit). Of the three development prototypes, this option, located at 209 S B St, is on the largest lot. As shown in **Table 21**, the building's gross area is 37,300 square feet, with a net leasable area of 31,705 square feet.

**Table 21. Option 2 Project Summary**

| LOT AREA                      |               |
|-------------------------------|---------------|

| Parking Garage Cost           | \$25,000      |
| Building Cost - Multifamily   | \$250         |

## Sales Price and Costs

Assumptions on sales prices and project costs are shown in **Table 21**. The rental rate for this prototype is set as \$2.25 per square foot. Vertical construction costs are set at \$250 per square foot, which is a lower cost than Option 1. Construction costs for parking are set at \$3,500 per surface parking space and \$5,000 per tuck under space. Land acquisition costs are much lower than Option 1 (\$25 per square foot) since this site is in a less central location Downtown. Site work costs are set at \$10 per square foot of land.

As shown below in **Table 22**, soft costs for Option 2 are estimated to be around \$2 million. With total hard costs estimated at \$9.54 million, the total cost for this project is estimated to be \$12.37 million. This translates to \$332 per building square foot and \$294,431 per residential unit.

**Table 22. Option 2 Project Costs**

| <b>PROJECT COSTS</b>               |                           |                      |

| Per Unit                           |                           | \$294,431            |

Source: Economic & Planning Systems

Since this prototype is a rental property, annual operating expenses are much higher than Option 1. Shown in **Table 23**, this property is expected to generate an Effective Gross Income (EGI) of \$847,661 annually, while annual expenses total around \$214,326. This equates to a net operating income of \$633,335.

## Feasibility Gaps

Option 2's return on cost is estimated to be 7.8 percent, as shown in **Table 24**. Although this option generates a positive return, unlike Option 1, the return on cost is still lower than the target return rate of 12 percent. Based on these assumptions, this development has a financial feasibility gap of \$516,648. Compared to Option 1, this option is potentially viable if certain elements can be addressed, or public support can be gained. The focus of this type of project is oriented towards the Livingston workforce with rental rates for units around \$1,700 per month.

The urban renewal authority may be interested in supporting this type of project with tax increment dollars to cover public costs and closing the feasibility gap. Depending on rental rates for the project compared to income/rental limits for affordable housing in the county, there may be potential to seek financing support through tools aimed at developing affordable housing (e.g., low-income housing tax credits).

**Table 24. Option 2 Project Return on Cost and Gap**

| <b>PROJECT RETURN AND GAP</b> |              |
|-------------------------------|--------------|
| <b>PROJECT COST</b>           |              |

## Option 3: Townhomes on Front Street

The third housing prototype analyzed includes 12 for-sale townhomes with an average unit size of 1,667 square feet. These townhouses, located at a site at the corner of W Front Street and N Main St, are 3-stories each with tuck under parking. As shown in **Table 25**, this development has a gross area of 20,000 square feet, and since these are townhouse units, the net leasable area is also 20,000 square feet.

**Table 25. Option 3 Project Summary**

| LOT AREA                       |             |                |
|--------------------------------|-------------|----------------|
| Front (Feet)                   |             | 100            |
| Side (Feet)                    |             | 135            |
| <b>Total Area (sq. ft.)</b>    |             | <b>13,500</b>  |
| <b>Total Area (ac.)</b>        |             | <b>0.31</b>    |
| MULTIFAMILY                    |             |                |
| <b>Gross Building Area</b>     |             |                |
| Ground Level                   |             | 0              |
| Floor 2                        |             | 10,000         |
| Floor 3                        |             | 10,000         |
| Penthouse                      |             | 0              |

| Tuck Under Cost                | per space   | <b>\$5,000</b> |
| Building Cost - Multifamily    | per sf      | <b>\$200</b>   |

## Sales Price and Costs

Assumptions used for sales prices and project costs are shown in **Table 25**. These townhouse units are assumed to sell for \$300 per square foot.

Vertical construction costs are set at \$200 per square foot, which is the lowest cost option of the three options. Construction costs for parking are set at \$5,000 per tuck under space (note that a two-car garage would count as two spaces). Land acquisition costs are set at the same lower rate as Option 2 (\$25 per square foot) due to the site's location. Consistent with the other two options, site work costs are set at \$10 per square foot of land.

Soft costs for Option 3 are estimated to total \$843,814 and hard costs are estimated to be nearly \$4.1 million. This prototype's total project cost is estimated to be \$5.4 million, which equals \$271 per building square foot and \$450,943 per townhome (**Table 26**).

**Table 26. Option 3 Project Costs**

| <b>PROJECT COSTS</b>               |                          |           |                  |
|------------------------------------|--------------------------|-----------|------------------|
| <b>Acquisition and Site</b>        |                          | <b>\$</b> | <b>472,500</b>   |
| Acquisition Cost                   |                          | \$        | 337,500          |
| General Site Costs                 |                          | \$        | 135,000          |
| Land Cost per Unit                 |                          |           | \$28,125         |
| <b>Hard Costs</b>                  |                          | <b>\$</b> | <b>4,095,000</b> |
| Tuck Under Cost                    | \$5,000 per space        | \$        | 95,000           |
| Building Cost - Multifamily        | \$200 per sf             | \$        | 4,000,000        |
| <b>Soft Costs</b>                  |                          | <b>\$</b> | <b>843,814</b>   |
| Design and Architecture            | 5.0% % of vertical costs | \$        | 200,000          |
| Building Permits                   | 1.0% % of HC             | \$        | 40,950           |

Since Option 3 is a townhome development, there are no annual operating expenses and the revenue generated from this project is solely from townhouse sales, as shown in **Table 27**.

**Table 27. Option 3 Operating Revenues and Expenditures, Static**

| Type                              | Factor       | Rate               | Lease Rate<br>per year | Total Revenue       | % of Total         |

## Feasibility Gaps

This prototype has a return on cost of 6.4 percent (**Table 28**). Like Option 2, this option generates a positive return, but this return rate still does not reach the targeted rate of 12 percent. Based on this model's assumptions, the townhome development option has a financial feasibility gap of \$300,671.

While Option 3 has the smallest financing gap, the need for additional financing support for this development to be feasible still exists based on its current configuration. The units are priced at an average of \$500,000, which is near the threshold for being too high to be affordable for the majority of the Livingston workforce. Achieving higher prices will make this project feasible but may limit the buyer pool. Different configurations and lower land costs could also lead to a feasible project.

Potential financial support or regulatory waivers may help to make these types of projects feasible with the goal of trying to expand the Downtown housing base and provide more housing options.

**Table 28. Option 3 Project Return on Cost and Gap**

| PROJECT RETURN AND GAP |             |
|------------------------|-------------|
| PROJECT COST           |             |
| Total Cost             | \$5,411,314 |
| Per GBA                | \$271       |
| Per Unit               | \$450,943   |
| STATIC EVALUATION      |             |
| Return on Cost         |             |
| Total Project Value    | \$5,760,000 |
| Total Project Cost     | \$5,411,314 |
| Project Return         | \$348,686   |
| Return on Cost         | 6.4%        |
| Target                 | 12.0%       |
| Target Return          | \$649,358   |
| Gap                    | \$300,671   |
| Gap per Unit           | \$25,056    |

## 1.0. INTRODUCTION

Livingston is located approximately 25 miles east of Bozeman and about 50 miles north of Yellowstone National Park. Its location makes it a popular destination for tourists and outdoor recreationists, predominantly during spring and summer months. It is also home to many Bozeman commuters seeking more affordable housing options. As regional growth pressures mount and tourism increases, the need for a cohesive vision for downtown Livingston is needed to revitalize underutilized areas and support the local economy that is heavily influenced by seasonal tourism.

In 2021, the City of Livingston adopted a Growth Policy that created a common vision for Livingston's future by guiding responsible growth while preserving the town's unique sense of place. An outcome of the Growth Policy was an action item to develop a comprehensive Downtown Master Plan to guide future growth. Accordingly, the City of Livingston has initiated a planning process to develop the *Livingston Downtown Master Plan* to provide a proactive approach to managing growth while maintaining the downtown's unique character and enhancing economic vitality.

As a supplemental component of the Master Plan, a parking study was conducted. Parking availability is an important consideration as the city contemplates growth and redevelopment strategies. The availability of parking is a necessary component for all development, including residential, retail, and commercial properties. However, as the availability of land is constrained, it is important to provide a balanced supply of parking to support new and existing developments. The purpose of this parking study is to evaluate existing parking needs and availability and identify strategies to optimize the parking supply to support future growth.

The study area for the Master Plan includes the greater Downtown Livingston area stretching from the BNSF railroad tracks to Sacajawea Park. The study area boundary encompasses the boundaries of the Livingston Urban Renewal Agency (URA), Downtown Historic District, and Central Business Zoning District. The parking study is focused on the area generally bounded by Park Street, 5<sup>th</sup> Street, Callender Street, 3<sup>rd</sup> Street, Geyser Street, D Street, Lewis Street, and E Street. A map of the study area is provided in **Figure 2.1**.

## 2.0. INVENTORY AND ENFORCEMENT

Within the study area, free public on-street parking is available on nearly all streets as shown in **Figure 2.1**. A combination of parallel and angled on-street parking is provided, as shown in the figure. Most of the angled parking is located on the east side of Main Street. Most on-street parking spaces allow parking for up to two hours. The two-hour time limit in the downtown core applies every day of the week between the hours of 9:00 AM and 5:00 PM. Further away from the downtown core, on-street parking is not time-restricted.

Handicap parking spaces are provided periodically throughout the downtown area. Loading zones are provided in some locations but are generally infrequent. The lack of loading zones has frequently resulted in delivery vehicles parking in the middle of a street if on-street parking is otherwise unavailable.

Figure 2.1: Existing Parking Supply

There are also several parking lots provided throughout the downtown area as shown in **Figure 2.1**. The parking lots are categorized based on their availability for public parking. Several businesses own and maintain parking lots for their customers only with restrictions on public parking (shown in orange). Several other businesses have open parking lots, primarily for the use of their customers, but do not have restrictions against public parking (shown in green), although some have one- or two-hour time limits. There is one public parking lot on B Street (shown in blue). Additionally, two downtown lots are managed by the City of Livingston and are open to the public on a permit basis (shown in teal).

*American Bank parking lot restrictions.*

**Figure 2.2** illustrates the available public parking supply within the downtown area. For purposes of this study, only the parking lots which are available for unrestricted public parking (blue and green lots), as labeled in **Figure 2.1**, were included. Parking lot capacities were estimated based on aerial imagery and confirmed during field reviews. Capacities for gravel lots, or lots without defined parking stalls, were estimated based on observed use. On-street parking locations and capacities are also shown in **Figure 2.2**. The capacities were calculated by dividing the parking zone length by an average stall length of 27 feet.

## 2.1. Enforcement

In 2023, the City of Livingston underwent personnel restructuring and removed the Code Enforcement position from the Police Department. The new position employs two personnel who are responsible for ensuring city code compliance, which includes the 2-hour parking downtown, abandoned vehicles, trailers parked over the time allotment, blight, overgrown weeds, snow removal, along with other city codes. Parking complaints can be submitted by citizens via an online reporting form. The penalties for parking code violations are shown in **Table 2.1**. According to city officials and public feedback received during the outreach effort for the *Livingston Downtown Master Plan*, these changes have helped with parking availability downtown.

Livingston also allows vehicles, such as construction or utility vehicles, wishing to park in a time-restricted space within the central business district for a prolonged period to purchase either a half day or full day parking pass. In October 2023, the Livingston City Commissioners voted unanimously to increase the fee for vehicles from \$10 per day to \$50 for half a day or \$100 for a full day in the downtown two-hour parking zones.<sup>1</sup> The current parking space rental fees are shown in **Table 2.2**. These rates allow vehicles to park for extended periods in prime parking spots as needed.

**Table 2.1: Parking Violation Fines – Dec 2023**

|                                               |       |
|-----------------------------------------------|-------|
| Overtime in Time Zone                         | \$20  |
| Double Parking                                | \$20  |
| Loading Zone                                  | \$20  |
| Blocking Residence Alley                      | \$20  |
| Truck Over 16,000 GVW in Residential Area     | \$20  |
| Parked Over 72 Hours Not in Running Condition | \$20  |
| Parked on Street Without Current Registration | \$20  |
| No Parking Zone                               | \$25  |
| Wrong Side of Street                          | \$20  |
| Blocking Driveway                             | \$20  |
| Over 18 inches from Curb                      | \$20  |
| Blocking Crosswalk                            | \$20  |

Figure 2.2: Parking Supply Capacity

### 3.0. UTILIZATION

The parking utilization study was completed over two days in August 2023: Thursday, August 10<sup>th</sup>, and Friday, August 11<sup>th</sup>. Data was collected during normal enforcement hours, between 9:00 AM and 5:00 PM. This timeframe was selected to capture the typical parking use during the peak summer season. Activity in Downtown Livingston is heavily influenced by seasonal tourism, so the summer season is typically the busiest time of year. Outside the summer season, parking availability is less constrained.

**Appendix A** details the 23 public parking lots, their capacities, and the utilization data collected. There are an estimated 530 parking spaces available in these downtown lots. Parking utilization rates were calculated for the average and peak hours. Hourly parking utilization rates represent an average percentage of occupancy observed over the two-day period. The peak utilization rate is the maximum observed during any given period over the two days. It is generally accepted in the parking industry that people typically perceive parking as full once about 90 percent of the spaces are occupied because they are then forced to search for an alternate location from their first choice. Accordingly, time periods where parking utilization was greater than 90 percent are denoted in red in the table.

**Appendix B** details the on-street parking areas, their capacities, and the utilization data collected. There are an estimated 1,615 parking stalls available in the downtown area. For the utilization study, on-street parking occupancy was inventoried by block with each side of the street being considered a separate parking area. Parking utilization rates were calculated in the same manner as used for parking lot utilization. There were several observed periods where parking utilization on a single street was greater than 90 percent as denoted in red in the appendix. In some cases, the occupancy data exceeded the available parking capacity value, resulting in utilization percentages greater than 100 percent, which may indicate that some motorcycles were counted or that some vehicles were parked illegally.

**Figure 3.1** shows the average parking utilization downtown and **Figure 3.2** shows the peak parking utilization. The mapping shows that parking areas closer to the downtown core are typically more highly utilized than those further away. Main Street and the B Street Public Parking Lot have the highest average parking utilization rates. Although many parking areas approach or reach capacity at some point throughout the day, most of the parking areas have an average utilization of less than 75 percent.

As observed in **Appendix A** and **Appendix B**, there were few occasions where parking areas were more than 90 percent utilized, which indicates that most of the time drivers should be able to find parking at or near their desired destination. Only select locations consistently had utilizations near or at capacity, most notably along Main Street between Park and Lewis Streets. The tables also demonstrate relatively small hourly differences in parking utilization rates, which indicates generally consistent turnover and demand. Field observations and stakeholder input indicate that turnover is relatively low and that parking spots are often occupied for the full two-hour time allotment. Since enforcement was increased in 2023, turnover and compliance have been noted to improve.

Figure 3.1: Average Parking Utilization

Figure 3.2: Peak Parking Utilization

## 4.0. ADDITIONAL CONSIDERATIONS

The data collected for this parking study represents the peak summer season. Outside of the summer season, parking utilization is often much lower, and there are fewer issues finding available parking at or near desired destinations. Although this data provides a glimpse into seasonal capacity constraints, parking use during other time periods should be considered.

Additionally, the needs of different user types should be considered. A variety of different users, including downtown residents, employees, hotel guests, restaurant/bar patrons, retail shoppers, and delivery vehicles, need to park downtown. Each user type has different needs in terms of parking duration and location, ranging from a brief 15-minute delivery next to the drop-off location to a day-long stay or more in a secure location for residents and hotel guests.

During the public outreach effort for the Master Plan, several participants also expressed concerns about parking availability for employees of downtown businesses. Employees often choose to park in on-street areas near their places of employment with two-hour time restrictions. To avoid citations, employees must move their vehicles every few hours. Reparking is inefficient for employees, business owners, city staff, and other downtown visitors and undermines the intent of time restriction regulations. The shuffling of cars can also contribute to congestion downtown.

## 5.0. CONCLUSION AND RECOMMENDATIONS

The data collected for this utilization study indicates that between designated parking lots and on-street parking, there is an ample supply of parking when looking at the entire downtown area. However, some concentrated areas are commonly near capacity, requiring parking to occur a block or two away from desired locations. This is most common with on-street parking in the downtown core, generally bounded by Park Street, 2<sup>nd</sup> Street, Lewis Street, and B Street, with the highest utilization rates along Main Street.

During public and stakeholder meetings, there was mixed opinion on if additional parking was needed or if improved management strategies would help alleviate the concerns. Some expressed a desire for additional surface parking, or a parking structure, near the downtown core where parking utilization is highest. While data was not collected as part of this study, it was also noted that there are multiple privately owned lots which restrict public use which results in underutilization at key locations.

Given the high cost of adding surface parking, it is likely more feasible to focus on improving the existing system through management and “right-sizing” strategies. The following summarizes potential strategies to consider as part of the *Livingston Downtown Master Plan*.

### Varied Time Restrictions

Using time limits to support a parking management program is a trusted industry best practice when used and enforced appropriately. Providing a variety of time limits is a simple, yet effective, way to support parkers with different needs. Shorter time spaces (an hour or less) are most effective in areas with high utilization and quicker turnover. These include drop-off, pickup, and loading zones as well as quick service dining and retail locations. Mid-term parking zones (~2 hours) are most common across downtowns and are typically adequate for the majority of patrons. These zones allow enough time for most retail shopping and dining activities. Long-term parking areas (greater than 2 hours) are needed for certain locations that require longer appointment times, meetings, or special uses. These are typically located on the periphery of the downtown area due to their lower turnover rates. A “right-sized” parking management system incorporates a variety of parking time restrictions to focus on the various needs of downtown users and businesses.

### **Employee Parking**

Business vitality depends on the availability of parking for both patrons and employees. To ensure employees have convenient parking opportunities, the city could implement a permit program with applicable parking options provided in several locations throughout the downtown area. Surface lots that are currently unrestricted or are otherwise currently underutilized could be allocated for the use of employees with proper permits. A successful program would require several locations for permit holders. Permit hours and allocated spaces can be modified depending on program demand and utilization. Assignment of fees for all-day, off-street employee parking permits can help ensure the sustainability of the program and pay for the administrative costs to manage and enforce the program.

### **City Parking Management**

The city manages two off-street parking lots, one on Lewis Street between Main Street and B Street and another on 2<sup>nd</sup> Street between Lewis Street and Clark Street (denoted in teal on **Figure 2.1**). These lots are managed and controlled by the city through a permit program. Between these two lots, approximately 55 parking stalls are available. These lots are variably utilized and could be leveraged to provide additional permitted employee parking stalls as discussed in the previous section. In general, the city should periodically review permit holders to ensure maximum utilization by local residents.

Additionally, these off-street lots could also be converted to pocket parks or programmable open spaces, as described in the Parks and Open Space Recommendations of the Master Plan. Since the city already controls these lots, it would be easy to re-designate the lots as open space for temporary community events and other short-term use during off-peak seasons.

### **Pay for Parking**

Currently, all downtown parking in Livingston is free to use, except the day-long parking permits shown in **Table 2.2**. Although the city generally desires to avoid paid parking, it can be an effective management strategy to consider in the future. Paid parking offers a range of benefits, including the ability to offer incentive programs, utilize rates that influence driver behavior, and encourage the reduction of single occupancy vehicles or the use of alternate modes of transportation. Additionally, revenues from paid parking can help support parking operations, required staffing, and ongoing maintenance, creating a sustainable parking management strategy. Paid parking combined with time restrictions can be an effective way to help support increased turnover downtown.
